Historical information on interactions, correspondence, payments, promises, disputes and adjustments along with collection notes, aging data and customer metrics is available.

Figure 1: View collections data at the operating unit, customer, account, bill-to site or transaction level.

Payments, disputes, adjustments, and promises to pay are easily captured and automatically tracked; broken promises are automatically assigned for timely follow-up. Using single collections agent assignment or complex collections territory definitions, actionable work is automatically pushed to collections agents or agent groups.
