## **Disruptive Technology and Digital Transformation for Business and Government** Sandhu, Kamaljeet, 2021-05-07

With the far reaching global impact of the COVID 19 pandemic the demand and the necessity for digital enterprise transformation have accelerated exponentially Management and strategies for the adoption and wider usage of newer digital technologies for the transformation of an enterprise through digital tools such as real time video communications have shown that people no longer need to be required to be physically present in the same place rather they can be geographically dispersed Technologies such as artificial intelligence cloud computing digital banking and cloud data have taken over tasks that were initially done by human hands and have increased both the automation and efficiency of tasks and the accessibility of information and services Inclusion of all these newer technologies has shown the fast pace at which the digital enterprise transformation is rapidly evolving and how new ecosystems are reshaping the digital enterprise model Disruptive Technology and Digital Transformation for Business and Government presents interesting research on digital enterprise transformation

at different stages and across different settings within government and industry along with key issues and deeper insights on the core problems and developing solutions and recommendations for digital enterprise transformation The chapters examine the three core leaders of transformation the people such as managers employees and customers the digital technology such as artificial intelligence and robotics and the digital enterprise including the products and services being transformed They unravel the underlying process for management and strategies to fully incorporate new digital tools and technologies across all aspects of an enterprise undergoing transformation This book is ideally intended for managers executives IT consultants business professionals government officials researchers students practitioners stakeholders academicians and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective

*States of Entanglement* Sven Anderson, Alan Butler, David Capener, Donal Lally, Clare Lyster, Fiona McDermott, 2021-07-21  
Investigates how data production and consumption territorialize the physical landscape filtered through Ireland's role in global communications and as told by the Irish Pavilion at the 2021 Venice Architecture Biennale features an installation that focuses on the materiality of data infrastructure in space As our everyday lives become increasingly entangled with data technologies the book addresses the utopian fantasy that surrounds the Cloud as transcending physical presence or resourcing By bringing the physical infrastructure around data and its impact on the environment under the spotlight it hopes to reframe how we understand data production and highlight the myth that information technologies are hidden and without major material manifestations on the landscape The context for the book is Ireland which has a significant historical role in the evolution of global communications and data infrastructure In 1866 the world's first transatlantic telegraph cable landed on the West coast of Ireland In 1901 the inventor of the radio Guglielmo Marconi transmitted some of the world's first wireless radio messages from Ireland across the Atlantic Ocean to Newfoundland Today Dublin has overtaken London as the data centre hub of Europe hosting 25% of all available European server space And by the year 2027 data centres are forecast to consume a third of Ireland's total electricity demand The book aims to raise awareness around the hardware of the global internet and Cloud services which is interwoven with the Irish landscape made manifest through the vast constellation of data centres fibre optic cable networks and energy grids that have come to populate its cities and suburbs over recent decades The publication accompanies and supports Entanglement the Irish Pavilion at the 17th Venice Architecture Biennale by archiving the production of the pavilion filtered through a series of poetic excerpts that describe the form components content and furniture that make up the installation At the same time the book is conceived as more than just a catalog by positioning some of the cultural and spatial implications of data technologies in Ireland within a more universal context through contributions by ANNEX the team selected to produce the pavilion as well as invited contributors from the disciplines of Media Theory Journalism Computer Science Geography History and Architecture *The AOC Way* Caroline Fredrickson, 2020-01-07 Understanding and applying the wisdom of Congresswoman Alexandria Ocasio Cortez In an

incredibly short time Alexandria Ocasio Cortez has galvanized the country on issues of national importance This young member of Congress has motivated Democrats to confront climate change and income inequality and is upending conventional wisdom about how young women especially women of color are supposed to behave Her background including a family that fell out of the middle class due to health care challenges has driven her to champion those on the margins such as low wage workers immigrants people of color and younger people who face a future of climate disruption and instability This book takes life lessons from the rising star known as AOC and offers readers a chance to apply them to their own lives In five chapters The AOC Way weaves substantive issues and AOC's experiences to understand how she so quickly came to dominate media coverage in America but also to drive real change in what seems like a lightening flash AOC has demonstrated some key values and commitments on her way to success such as believing in yourself and not letting haters take you off course working hard and being prepared to prove your talents bringing your experiences to your work by not forgetting how you got where you are challenging the status quo and staying true to your friends and allies
