

• CUDA Practice without a GPU

In this notebook, I'll show you how you can practice CUDA with the cheapest way possible if you do not own an NVIDIA chip of any sort. Prior to starting the runtime, go to `cd` on the top left corner of the page. Click on Notebook, Settings, and choose any for the accelerator option. Before we run any commands, please make sure your Google drive is successfully mounted to the notebook. These 2 steps are super important!

• cd to Practice Directory

As how you would operate on your local machine, cd your way to the directory or folder you will be working on. Note, usually, running the commands with `.` in front of it suffice, but the `..` in front of cd ensures that the entire notebook is now in the newly specified directory. If we want to cd out our/you, only that cell would move to that new directory, but the next cell would go back to the root directory again.

```
1 | # cd to your own path here  
2 | cd ..  
3 | cd ..  
4 | cd ..
```

```
Mounted at /mnt/gdrive/you/your/path

# cd ..

• Executing a C++ program

Once you have moved to your current directory, upload the c++ program to the same directory.

1. On the left of your screen, you should see a vertical navigation bar, click on the folder icon.
