As well as recognizing the lack of consensus surrounding the very nature of Fraser's concept of progressive neoliberalism, the book delivers a diversity of perspectives and methodological orientations that offer critical and nuanced examination of the diverse ways in which progressive neoliberalism has shaped education in North America. Documenting manifestations of progressive neoliberalism in areas including anti-racist education, teacher education, STEM and assessment, the volume uses qualitative empirical research and critical discourse analysis to identify emerging tools and strategies to disentangle the progressive aims of education from neoliberal agendas. Offering a rarely nuanced treatment of the phenomenon of neoliberalism, this text will benefit scholars, academics and students in the fields of education, policy and politics, the sociology of education and the philosophy of education more broadly. Those involved with the theory of education and multicultural education in general will also benefit from this volume **The Amazon and Madeira Rivers** Franz

Marketing grade 1 7 Sophia Antipolis Campus France SKEMA Business School language English abstract The German retailer REWE Markt emphasizes digital innovation in their business strategy to optimize its supply chain efficiency and to be first in new innovative solutions that attract customers in and off-store, off and online. The following paper addresses digital innovation practices of REWE Markt over the past years as well as its role within the retail industry that it takes in digital terms. For 2016 one can expect new dynamics in the retail business in Europe. Amazon announced in 2015 to introduce Amazon Fresh in some European countries. Its online shopping service for fresh grocery will include delivery times less than twenty-four hours after putting the order. Competitors' reactions have been, for instance, improved delivery times of only a few hours after the order to outperform Amazon in advance. E-commerce is merely one of the big digital issues where retailers are forced to invest. Connected with that is also a great logistic chain that has to be digitally coordinated in order to keep track on the demand and crowds of data that have to be processed. Furthermore, there are efforts to develop digital in-store solutions for an improved shopping experience. In the past years, big traditional retail players have missed the chance to develop accordingly to the pace of technological developments. Now where non-traditional retail companies such as Amazon expand into grocery offerings as well as extent their logistical facilities, they are finally in their wake-up mode and grow their

efforts to innovate digitally as this is a key competitive factor     *Entrepreneurship* Marc J.
