Introduction to Science of Fasting for Healthy Body Ram Babu Sao, 2025-05-20 Fasting has been used for the body to get rid of waste buildup and also for religious and spiritual purification for centuries Nearly every religious text from the Old and New Testaments of the Upanishads as well as Bible to the Quran calls upon followers to fast periodically as a rite of spiritual purification penitence or preparation for union with God Fasting advocates and claims that the practice can effectively treat serious health conditions like diabetes constipation arthritis and colitis to heart disease and depression In his practice he has seen fasting combined with improving the diet before and afterwards which eliminates lupus arthritis and chronic skin conditions like psoriasis and eczema He says he has also seen fasting heal the digestive tracts of those with ulcerative colitis and Crohn's disease and lower blood pressure Fasting followed by a vegetarian diet interferes with the immune system's activities especially if the immune system is overreacting as it does with and other auto immune diseases He cites half a dozen studies published in medical journals ranging from the American Journal of Physiology Endocrinology and Metabolism to the Scandinavian Journal of Rheumatology Studies published in The Proceedings of the National Academy of Sciences and The Journal of Nutrition in 2003 showed that human beings forced to fast every other day while eating twice the normal amount of food on non fasting days had better insulin control neuronal resistance to injury and other health indicators than people fed calorie restricted diets Fasting may yield psychological benefits as well I use very brief fasting with my patients to help them cope with stress and depression says Agnese Barolo a life coach in contemplative practices in New Rochelle N Y So now many are so encouraged that they try longer fasts she says There is scientific evidence for the curative powers of fasting That is a reason every culture in every country has practised some form of fasting for thousands of years Fasting is not advisable for everyone But for those whose medical conditions do not respond to other treatments Fuhrman says sometimes fasting four to five days a month can help them break to the next level of immune competency He adds that it will only work if you frame the fast with good nutrition before and after Fuhrman cautions that certain people should not fast including Pregnant women People with wasting diseases or malnutrition Those with a history of cardiac arrhythmias People with hepatic or renal insufficiency And anyone who fasts for extended periods should do so only under close medical supervision Fasting gives Longer Life There are hundreds of studies showing that when people are fed fewer calories they live longer says Fuhrman Studies on animals ranging from earthworms to monkeys have shown that

alternating cycles of fasting and very calorie restricted diets are a reliable way to extend the lifespan. The excess calories Americans eat shorten their lives says Fuhrman. If you want to live longer Fuhrman's best advice is to eat healthy and fast periodically. The time may come Fuhrman says when not offering to fast substantially more effective nutritional approach will be considered malpractice.
