Military Power Explaining Victory And Defeat In Modern Battle:

Military Power Stephen D. Biddle, 2004 Fascinating precisely written indeed brilliant Military Power is among the most important books ever published on modern warfare **Grand Strategy in Theory and Practice** William C.

Martel, 2015-01-12 This book explores fundamental questions about grand strategy as it has evolved across generations and countries It provides an overview of the ancient era of grand strategy and a detailed discussion of its philosophical military and economic foundations in the modern era The author investigates these aspects through the lenses of four approaches those of historians social scientists practitioners and military strategists The main goal is to provide contemporary policy makers and scholars with a historic and analytic framework in which to evaluate and conduct grand strategy By providing greater analytical clarity about grand strategy and describing its nature and its utility for the state this book presents a comprehensive theory on the practice of grand strategy in order to articulate the United States past present and future purpose and position on the world stage **Four Battlegrounds** Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick

One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of *Burn In* An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future *Four Battlegrounds* argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to

remain at the forefront of the world order [Who Wins?](#) Patricia L. Sullivan (Ph. D.), Patricia Sullivan, 2012-07-16 Why are states with tremendous military might so often unable to attain their objectives when they use force against weaker adversaries Who Wins by Patricia L Sullivan argues that the key to understanding strategic success in war lies in the nature of the political objectives states pursue through the use of military force **The Journal of Military History**, 2007

Drones and Global Order Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order. The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal, moral, and ethical impacts. These three waves of scholarship do not however address the implications of drone warfare for global order. This book fills the gap by contributing to a fourth wave of literature concerned with the trade offs imposed by drone warfare for global order. The book draws on the English School of International Relations Theory which is premised on the existence of a society of states bounded by common norms, values, and institutions to argue that drone warfare imposes contradictions on the structural and normative pillars of global order. These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict. The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order. This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored: rigorously drone warfare can sometimes strengthen global order. The volume concludes by proposing a research agenda to reconcile the complex and often counter-intuitive impacts of drone warfare for global order. This book will be of considerable interest to students of security studies, global governance, and International Relations. **The USA and the World** David M. Keithly, 2007-08

Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur, 2004 *The Globalization of World Politics* John Baylis, Steve Smith, Patricia Owens, 2008 Now in its fourth edition this internationally successful text has been fully revised and updated in light of recent developments in world politics with new chapters on the changing nature of war, human security, and international ethics. A comprehensive introduction to international relations it is ideally suited to students coming to the subject for the first time. It provides a coherent, accessible, and lively account of the globalization of world politics. FEATURES Contains work from an impressive line up of international contributors who are experts in their fields. The chapters have been carefully edited in order to ensure an integrated and coherent style throughout the book. Covers history, theory, structures, and processes and international issues. Offers a visually stunning 4 color interior. Enhanced by a comprehensive Companion Website www.oup.com/uk/orc/bin/9780199297771 that includes a test bank, PowerPoint slides, case studies, multiple choice questions, links to journal articles, a flashcard glossary, and new to this edition video clips, video podcasts of contributors, and a news feed. NEW TO THIS EDITION Three new chapters on the changing nature of war

human security and international ethics Each chapter includes a 400 word case study More examples from the developing world Globalization and Transatlantic Security Rachel A. Epstein,Pascal Venesson,2006 Military Economics Ron Smith,2009-10-29 Military power needs to be financed and economic development is often shaped by military conflict thus the interaction of military and economy power and money is central to the modern world This book provides an accessible introduction to the economics of the use of organised force with a wide range of historical and current examples   Ron Tira,2007 Merchants of African Conflict Sabelo Gumede,2011 Despite their tarnished image private military and security companies PMSCs continue to feature in almost every African conflict Their presence in conflict zones presents a plethora of challenges as they generally remain unregulated and uncontrolled Initiatives aimed at addressing the involvement of PMSCs in conflict theatres have thus far also proved to be ineffective The engagement in vigorous multidisciplinary approaches aimed at championing and improving these initiatives remains critical in addressing the insecurities posed by these merchants of conflict particularly in Africa This monograph is intended to make a modest contribution to this complex yet interesting discourse through various authors presenting diverse and fascinating perspectives **The Utility of Force** Patricia Lynne Sullivan,2004 *Rational Theory of International Politics* Charles Louis Glaser,2010 Why do states sometimes compete and wage war while at other times they cooperate and pursue peace Does competition reflect pressures generated by the anarchic international system or rather states own expansionist goals This title offers a theory of international politics that identifies the kinds of variables that influence a state's strategy

Naval War College Review ,2008 *America, History and Life* ,2007 Article abstracts and citations of reviews and dissertations covering the United States and Canada **The 2006 Lebanon Campaign and the Future of Warfare** Stephen D. Biddle,Jeffrey A. Friedman,2008 Hezbollah's conduct of its 2006 campaign in southern Lebanon has become an increasingly important case for the US defense debate Some see the future of warfare as one of nonstate opponents employing irregular methods and advocate a sweeping transformation of the US military to meet such threats Others point to the 2006 campaign as an example of a nonstate actor nevertheless waging a state like conventional war and argue that a more traditional US military posture is needed to deal with such enemies in the future This monograph seeks to inform this debate by examining in detail Hezbollah's conduct of the 2006 campaign The authors use evidence collected from a series of 36 primary source interviews with Israeli participants in the fighting who were in a position to observe Hezbollah's actual behavior in the field in 2006 coupled with deductive inference from observable Hezbollah behavior in the field to findings for their larger strategic intent for the campaign **Battles as Information** Kristopher Barrett Grady,2008 The received literature indicates that domestic political institutions afford accountability over the executive of a state This finding is especially applicable to war policy given the enormous costs and stakes endogenous to a war The constraints placed upon the executive are exerted by a group of actors who have the ability to remove and or punish if in a post hoc review a war turns

out to be sufficiently deleterious to their interests The specter of future sanction is thought to condition executive behavior but what if domestic political figures do not forestall judgment until the end of a conflict Assuming the ability of the enfranchised members of a state to evaluate ongoing war policies evidence of domestic political pressure might inspire a change in these policies prior to the end of a war Instead of war outcome and duration being determined by the prospect of sanction after a war s conclusion the threat of executive sanction might affect the conduct of the war well before its conclusion Abstract
