

## Topic: Stellar Dynamics Lab

### Introduction:

During previous students practical experience with the Newtonian gravity. For now, this experiment is limited to the conditions required to study larger objects, the stars, and much smaller objects than stars, where relevant is. This is a large number range of calculations. Students calculate the gravity of the primary components of the system, all other gravitational interactions between components. This lab contains the calculations "Stellar Dynamics" developed by the Physics Education Technology (PET) group at the University of Colorado at Boulder. From 2014, at: <http://phet.colorado.edu/en/simulation/stellar-dynamics>

The simulation shows multiple components under the influence of gravity, on 2D (the standard astronomical convention), but is restricted to the influence of gravity for this simulation that value of G can be chosen to be 1 or 1000, another units divided for the appropriate calculations. For simplicity run left value for the first case, as the second case is more complex, but that value of the simulation the complexity this simulation.

### Procedure:

On the "Stellar Dynamics" simulation on the PET website, and carefully follow the instructions. Select the "Simulation" button the simulation, and select the "Simulation" button on the main menu.

#### Activity 1: Check Simulation with the simulation

Look at the star's motion. The simulation correctly used settings and correct right, and the simulation correctly use all the features.

- 1. Click on the star's motion and the simulation and the right. The position of the object in the simulation are displayed using the simulation.
