STEP 4: Analyze

The annual net cash flow associated with the project from years 1 through 9 is \$152,000.

c. Find the terminal cash flow.**STEP 1: Picture the problem**

The terminal cash flow (TCF), encompasses not only the revenues and operating expenses (after-taxes) corresponding to the operation of the asset (the annual free cash flow) but also any additional cash flows in the final year related to an after-tax salvage value of the project, if any, plus any working capital investment recovered when the project is shut down.
