[Spirituality and Mental Health: Exploring the Meanings of the Term 'Spiritual'](#) Marcelo Saad, Everton Maraldi, Elaine Drysdale, 2022-07-27 **The Survival Hypothesis** Adam J. Rock, 2014-04-04 Contemporary parapsychology tends to be preoccupied with ESP telepathy clairvoyance precognition and psychokinesis In contrast this cutting edge anthology assembles an international team of experts from the fields of psychology parapsychology philosophy anthropology and

neuroscience to examine critically what is referred to as the survival hypothesis the tentative statement or prediction that some aspect of our personhood e g consciousness persists subsequent to the death of the physical body The appraisal of the survival hypothesis will be restricted to the phenomenon of mediumship that is humans who ostensibly communicate with the deceased The book has been divided into four main sections Explanation and Belief Culture Psychopathology and Psychotherapy Empirical Approaches The Present and Future The issue of postmortem survival is supremely relevant to us all because the human encounter with death is of course a certainty

**What Can Neuroscience Learn from Contemplative Practices?** Zoran Josipovic, Bernard J. Baars, 2016-09-22 A recent wave of brain research has advanced our understanding of the neural mechanisms of conscious states contents and functions A host of questions remain to be explored as shown by lively debates between models of higher vs lower order aspects of consciousness as well as global vs local models Baars 2007 Block 2009 Dennett and Cohen 2011 Lau and Rosenthal 2011 Over some twenty five centuries the contemplative traditions have also developed explicit descriptions and taxonomies of the mind to interpret experiences that are often reported in contemplative practices Radhakrishnan Rinbochay reflexivity or self knowing associated with consciousness the sense of self and consciousness and aspects of consciousness that are said to continue during sleep These real or claimed aspects of consciousness have not been fully integrated into scientific models so far This Research Topic in Consciousness Research aims to provide a forum for theoretical proposals new empirical findings integrative literature reviews and methodological improvements inspired by meditation based models We include a broad array of topics including but not limited to replicable findings from a variety of systematic mental practices changes in brain functioning and organization that can be attributed to such practices their effects on adaptation and neural plasticity measurable effects on perception cognition affect and self referential processes We include contributions that address the question of causal attribution Many published studies are correlational in nature because of the inherent difficulty of conducting longitudinal experiments based on a major lifestyle decision such as the decision to commit to a mental practice over a period of years We also feature clinical and case studies integrative syntheses and significant opinion articles

**Debating Psychic Experience** Stanley Krippner, Harris L. Friedman, 2010-09-02 This book presents a provocative debate between parapsychological advocates who claim that Western science s worldview is incomplete and counteradvocates who insist that parapsychological data is either spurious or can be

explained by standard scientific principles Despite ongoing and repeated attempts to prove or disprove the existence of parapsychological events there are still no conclusive findings and certainly no consensus across the worldwide community of scholars scientists and proponents of psychic phenomena Still there is no shortage of information about this fascinating topic to allow everyone to draw their own conclusions This book has been expressly written to make each chapter and topic accessible to a general audience despite containing a vast amount of theoretical material The book is organized into two parts in the first section proponents of the validity of parapsychological data and critics who reject that validity state their respective positions In the second part each group responds to each others statements in the form of a debate Other experts from the United States as well as from Australia and Great Britain provide overviews and conclusions
