**Law and Technology** Nanci K. Carr,2024-09-26 Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues

**The Cost of Free Land** Rebecca Clarren,2023-10-05 Sharply insightful A monumental piece of work The Boston Globe Growing up Rebecca Clarren only knew the major plot points of her immigrant family's origins Her great great grandparents the Sinykins and their six children fled antisemitism in Russia and arrived in the United States at the turn of

the 20th century ultimately settling on a 160 acre homestead in South Dakota Over the next few decades despite tough years on a merciless prairie and multiple setbacks the Sinykins became an American immigrant success story What none of Clarren's ancestors ever mentioned was that their land the foundation for much of their wealth had been cruelly taken from the Lakota by the United States government By the time the Sinykins moved to South Dakota America had broken hundreds of treaties with hundreds of Indigenous nations across the continent and the land that had once been reserved for the seven bands of the Lakota had been diminished splintered and handed for free or practically free to white settlers In The Cost of Free Land Clarren melds investigative reporting with personal family history to reveal the intertwined stories of her family and the Lakota and the devastating cycle of loss of Indigenous land culture and resources that continues today

Kew,2023-12-13 This book uses a quantitative science based approach to explain where the greenhouse gas GHG emissions emitted by the fashion industry are generated and it explores what strategies can be deployed to achieve Net Zero by 2050 With GHG emissions currently predicted to triple by the middle of the century the fashion industry is far off course to reach Net Zero as set out in the Paris Agreement With misinformation and greenwashing representing an ever growing barrier to potential solutions the book aims to demystify the source of GHG emissions from the industry breaking down in detail their origin while identifying the steps that can be taken when designing and sourcing new products Detailing the market drivers and trends in fashion consumption it argues that change should be guided by science based quantitative principles Accessibly written with key insights at the end of each chapter this book will enable the reader to understand the tactics to tackle decarbonisation and ultimately outline five main strategies that can be deployed by the fashion and textile industries to align with the Paris Agreement This book serves as a practical guide for designers buyers and the fashion industry in general to develop and understand approaches and strategies to reduce energy consumption and the resulting GHG emissions to reach Net Zero
