party started **The Impact of Viral TikTok Trends on Today's Supply Chains** Toby Lazear,2022 The advent of social
media has changed the way in which consumers shop drastically and in turn the way in which supply chains function TikTok
due to its unique design has constructed an environment where products can become viral with much more ease than seen
on any prior social platform As a result companies are met with viral videos promoting their products entirely unbeknownst
to them and without preparation Supply chains must be agile to continue to meet customer demand in times when products
cannot stay on shelves long enough to be marketed This thesis serves to advise future companies with recommendations for
best practices when it comes to viral products on TikTok As for the research component much of the information found in the
literature review stems from outside sources The thesis then goes on to cover both case studies and interviews to analyze
specific instances of TikTok viral products and the resulting impact on brands that have experienced such shockwaves
Through the research conducted and conversations held conclusions were able to be drawn leading to exposing common
pitfalls companies can fall into when dealing with viral products Trendspotting and social listening constantly are now more
important than ever as brands must be able to recognize trends before the public does to change the narrative on their own
behalf and prepare behind the scenes from a supply chain perspective Having open lines of communication both cross
functionally and throughout the supply chain are crucial to ensure strong relationships and ease of flexibility in the event of
disruptions Because of the ever changing and growing platform of the app it is inevitable that more companies will soon be
experiencing the same cycle and it is better to know the best practices of preparation than be left playing catch up for years

The TikTok platform has become widely popular among younger generations and has influenced various industries and aspects of life. This systematic literature review using bibliometric methods aims to examine the current status of TikTok research since its initial development. A total of 402 journal articles from 2019 to 2022 were systematically selected from the Web of Science Core Collection. Descriptive statistical analysis identified the most contributing academic institutions, nations, journals, scholars, and influential studies. Using CiteSpace, three visualization types were implemented: cluster views, timezone views, and timeline views. The study results indicate that TikTok research has been explored through several clusters which cover various topics such as the platform's impact on society, politics, culture, and health information, as well as social attachment, functional ties, and their implications for public health. According to the co-word analysis, TikTok research revolves around body consciousness, social behavior, consumer behavior, and news media.
