*Agents and Artificial Intelligence* Jaap van den Herik, Ana Paula Rocha, Joaquim Filipe, 2018-06-20 This book contains the revised and extended versions of selected papers from the 9th International Conference ICAART 2017 held in Porto Portugal in February 24-26 2017. The 11 full papers were carefully reviewed and selected from 158 initial submissions. The papers are organized in two tracks. The first focuses on agents, multi-agent systems, software platforms, distributed problem solving and distributed AI in general. The second track focuses mainly on artificial intelligence, knowledge representation, planning, learning, scheduling, perception, reactive AI systems, evolutionary computing and other topics related to intelligent systems and computer intelligence.

**The Power of Information Networks** Lei Guo, Maxwell McCombs, 2015-12-07 The news media have significant influence on the formation of public opinion. Called the agenda setting role of the media, this influence occurs at three levels. Focusing public attention on a select few issues or other topics at any moment is level one. Emphasizing specific attributes of those issues or topics is level two. The Power of Information Networks: The Third Level of Agenda Setting introduces the newest perspective on this influence. While levels one and two are concerned with the salience of discrete individual elements, the third level offers a more comprehensive and nuanced perspective to explain media effects in this evolving media landscape: the ability of the news media to determine how the public associates the various elements in these media messages to create an integrated picture of public affairs. This is the first book to detail the theoretical foundations, methodological approaches and international empirical evidence for this new perspective. Cutting edge communication analytics such as network analysis, Big Data and data visualization techniques are used to examine these third level effects. Diverse applications of the theory are documented in political communication, public relations, health communication and social media research. The Power of Information Networks will interest scholars, students and practitioners concerned with the media and their social and cultural effects.

Advances in Information and Communication Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-02-13 This book presents high quality research on the concepts and developments in the field of information and communication technologies and their applications. It features 134 rigorously selected papers including 10 poster papers from the Future of Information and Communication Conference 2020 FICC 2020 held in San Francisco, USA from March 5 to 6 2020, addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of future research. Discussing various aspects of communication, data science, ambient intelligence, networking, computing, security and Internet of Things, the book offers researchers, scientists, industrial engineers and students valuable insights into the current research and next generation information science and communication technologies.

**Digital Humanitarians** Patrick Meier, 2015-01-06 The overflow of information generated during disasters can be as paralyzing to humanitarian response as the lack of information. This flash flood of information, social media, satellite imagery and more is often referred to as Big Data. Making sense of this data deluge during disasters is proving an impossible challenge for

traditional humanitarian
