The Future of Transport Between Digitalization and Decarbonization Michel Noussan, Manfred Hafner, Simone Tagliapietra, 2020-04-30 Energy systems are rapidly transitioning towards decarbonization thanks in part to innovative digital technologies and changing mobility demands. This open access book examines the decarbonization and digitalization transformation in the transport sector with a particular focus on energy consumption. By studying historical trends and outlining future scenarios the authors illustrate the evolution of energy consumption in the transport sector, compare alternative decarbonization strategies and analyze digitalization trends and their effects on energy consumption. The book addresses a broad readership of both academics and professionals working in the energy and transport industries as well as readers interested in the ongoing debate over energy mobility and climate change.

**Proceedings of the 2022 2nd International Conference on Financial Management and Economic Transition (FMET 2022)** Vilas Gaikar, Min Hou, Sikandar Ali Qalati, 2023-02-10 This is an open access book. As a leading role in the global megatrend of scientific innovation China has been creating a more and more open environment for scientific innovation increasing the depth and breadth of academic cooperation and building a community of innovation that benefits all. Such endeavors are making new contributions to the globalization and creating a community of shared future. **Words: Their History and Derivation** F. Ebener, 1871 The Science of Growth Sean Ammirati, 2016-04-26 In The Science of Growth venture capitalist and Carnegie Mellon professor Sean Ammirati tackles the dos and don'ts of successful scaling by looking at the startups that have won and lost. The lean

entrepreneurship movement has captivated Silicon Valley and entrepreneurs across the country. It's provided an agile framework to develop the right product solution for a given target market and is now used by almost every fledgling company to do just that. The next challenge is growth to achieve the financial returns and more importantly the impact they dreamed of when starting off on their adventure. Why do some companies realize the VC's goal of a 10x return on investment while others flounder? What differentiates the companies that become part of the fabric of our lives and remain responsive no matter how big they get from those that quickly fade? To find out, Ammirati looks at 20 different companies in pairs who have achieved product market fit at about the same point in history with the same general target customer, one of which has gone on to achieve real scale while the other languished. As his research reveals, just a handful of choices among them who to partner with, how to finance growth and how to use data make all the difference in the world. With such intriguing examples as LinkedIn vs. Spoke, Facebook vs. Friendster and McDonald's vs. White Castle, Ammirati shows the secret of the science of growth and how to cultivate it in any organization.
