meant to survive.

Woman of Power ,1988 *The Final Few* G.P. Kilpatrick,2024-08-14 The year is 2080 fifty years after a large asteroid crashed into the earth killing 99 percent of its inhabitants and destroying the infrastructure that supported civilization The few people that survived scratch out a meager existence hunting small animals fishing and gathering the few fruits and vegetables that grow wild on the new earth This is a story that begins in a community of thirty two living on the shore of a lake After fifty years of dim semidarkness caused by the smoke ash and debris that has circled the earth since the disaster the sun has reappeared and more plants have begun to grow raising hopes for a brighter future But those hopes are dashed when the fish in the lake that supported them through the dark days grow scarce Conflict wracks the small community as the leadership insists that they can survive where they are while the younger generation seeks to explore and rediscover the world beyond A political miscalculation and a clever ploy by one of the young residents results in approval of an expedition consisting of five members with vastly different skills and conflicting goals The expedition is wrought with danger discovery and surprising plot turns Meanwhile death in the community left behind upsets and challenges anything they have ever known It will take courage intelligence strength cooperation and faith for any of them to survive **The Fishbowl**

Principle Gendelman,Miller,Taus,2009-12 At the core it doesn't matter what you believe governs the fate of man and Earth what matters is that humans as a global society build a future that is sustainable and peaceful This is the ultimate human evolutionary development this is our challenge By tracing our existence from where we began to what we have become today this book explores the evolution and should we continue on our current path the subsequent possible obsolescence of human beings Far from a doomsday tome The Fishbowl Principle challenges readers to expand their worldview We need to change our measure of a successful life from simply existing to prospering The authors refuse to accept that life as we exist today is as good as it gets We argue that humans have reached a fragile tipping point and that instead of fragmenting and isolating ourselves in a future of despair we can and will work together to an even higher apex As a human race we examine what can be achieved if we look to our similarities instead of our differences If we could harness communication as a powerful and cost effective tool to bring us together and educate ourselves in a way that fosters sustainable and responsible population growth the positive transformation to our lives would be immeasurable Whether you exist today as a peasant in a tribal setting or as an urban dweller we explore fostering a sense of global community based on common ground not just niche existence We present tangible alternatives and pose thought provoking questions Our vision is a collaborative one and requires your participation A path back to evolution starts with you and includes all of us **Freeing Tammy** Jody Raphael,2007 The latest volume in the popular trilogy of books about women poverty and violence *Birth Echo* Nilton Filho,2025-11-27 The

television flickers blue across Ben's face while Maya's words hang in the air like smoke that has nowhere to go. She is telling him about the boss who laughed at her presentation about the subway elbow that bruised her ribs about the landlord's email that began. Unfortunately, Ben nods the way men have been taught to nod: small, economical eyes still glued to the game. Maya's throat closes first. Then her voice rises. Then the silence arrives, not soft, not sacred, but the kind that makes the radiator clank like gunfire. Two nervous systems speaking different childhood languages mistake each other for the enemy. This is not a book about men who won't talk and women who won't stop. This is a book about what happens when a body remembers danger long after the danger has changed its name. About the moment the amygdala hijacks the wheel and love becomes a car crash in slow motion. About the quiet daily revolution required to teach an adult nervous system that the war is over even when the body still ducks at loud voices. You will meet Maya and Ben, Carlos and Maria, the firefighter who texts too much and the engineer who disappears into her workshop. You will learn why his silence is not contempt and her volume is not attack. You will discover how to pause a fight long enough for two ancient survival blueprints to recognize: We are safe now. We are home. The apartment does not have to hold its breath forever. Come. Breathe with us.
