Multimedia Services in Intelligent Environments George A. Tsihrintzis, Maria Virvou, Lakhmi C. Jain, 2013-05-23
Multimedia services are now commonly used in various activities in the daily lives of humans. Related application areas include services that allow access to large depositories of information: digital libraries, e-learning and e-education, e-government and e-governance, e-commerce and e-auctions, e-entertainment, e-health and e-medicine and e-legal services, as well as their mobile counterparts, i.e. m-services. Despite the tremendous growth of multimedia services over the recent years, there is an increasing demand for their further development. This demand is driven by the ever-increasing desire of society for easy accessibility to information in friendly, personalized and adaptive environments. In this book at hand, we examine recent Advances in Recommender Systems. Recommender systems are crucial in multimedia services as they aim at protecting the service users from information overload. The book includes nine chapters which present various recent research results in recommender systems. This research book is directed to professors, researchers, application engineers and students of all disciplines who are interested in learning more about recommender systems, advancing the corresponding state of the art and developing recommender systems for specific applications. *New Directions in Intelligent Interactive Multimedia* George A. Tsihrintzis, Maria Virvou, 2008-06-18. This book summarizes the works and new research results presented at the First International Symposium on Intelligent Interactive Multimedia Systems and Services (KES IIMSS 2008) organized by the University of Piraeus and its Department of Informatics in conjunction with KES International, Piraeus, Greece, July 9-11, 2008. The aim of the symposium was to provide an internationally respected forum for scientific research into the technologies and applications of intelligent interactive multimedia systems and services. Besides the Preface, the book contains sixty-four (64) chapters. The first four (4) chapters in the book are printed versions of the keynote addresses of the invited speakers of KES IIMSS 2008. Besides the invited speaker chapters, the book contains fifteen (15) chapters on recent Advances in Multimedia Data Analysis, eleven (11) chapters on Reasoning Approaches, nine (9) chapters on Infrastructure of Intelligent Interactive Multimedia Systems and Services, fourteen (14) chapters on Multimedia Applications and eleven (11) chapters on Quality of Interactive Multimedia Services. Artificial Intelligence-Empowered Software Engineering 2024 Maria Virvou, Yoshinori Tanabe, Lakhmi C. Jain, 2025-11-05. This book contains extended versions of the works and new research results presented at the 15th International Conference on Artificial Intelligence empowered Software Engineering (AIESE2024) formerly Joint Conference on Knowledge based Software Engineering (JCKBSE), University of Piraeus, August 27-30, 2024, Greece. AIESE formerly JCKBSE is a well-established international biennial conference that focuses on the applications of Artificial Intelligence on Software Engineering. Its 15th edition was organized by the Department of Informatics of the University of Piraeus, Greece. This book is a valuable resource for experts and researchers in the field of artificial intelligence empowered and knowledge-based software engineering. It is also valuable to general readers in the fields of artificial and

computational intelligence and more generally computer science who wish to learn more about this exciting research field of software engineering and its applications An extensive list of bibliographic references at the end of each chapter helps readers to probe deeper into the application areas of interest to them

Visual Affect Recognition Ioanna-Ourania Stathopoulou, 2010 It is generally known that human faces as well as body motions and gestures provide a wealth of information about a person such as age race sex and emotional state This monograph primarily studies the perception of facial expression of emotion and secondarily of motion and gestures with the purpose of developing a fully automated visual affect recognition system for use in modes of human computer interaction The book begins with a survey of the literature on emotion perception followed by a description of empirical studies conducted with human participants and the construction of a face image database On the basis of this work a visual affect recognition system was developed consisting of two modules a face detection subsystem and a facial expression recognition subsystem Details of this system are demonstrated and analyzed and extensive performance evaluations and test results are provided Finally current research avenues leading to visual affect recognition via analysis of body motion and gestures are also discussed

BICS 2008 Calin Enachescu, Barna Laszlo Iantovics, F. G. Filip, 2009-05-26 This book contains selected papers presented at the International Conference Bio Inspired Computational Methods Used for Difficult Problems Solving Development of Intelligent and Complex Systems BICS 2008 organized by the Romanian Academy Bucharest and Petru Major University of Tg Mures held on 5-7 November 2008 at Petru Major University of Tg Mures Romania The aim of this conference was to bring together researchers working in the main areas of Complex Systems Artificial Intelligence Intelligent Systems and Natural Computing for presenting their recent results and exchanging ideas The papers included in the book provide an introduction and also a state of the art to the bio inspired computer science The areas covered were those of natural computing such as evolutionary and neural computing as well as younger research directions such as DNA computing ant colony optimization with connections and applications to intelligent complex systems and to medical informatics Thus both directions of research from biology to informatics and from informatics to biology are illustrated

Recent Advances in Multimedia Signal Processing and Communications Mislav Grgic, Kresimir Delac, Mohammed Ghanbari, 2009-10-14 The rapid increase in computing power and communication speed coupled with computer storage facilities availability has led to a new age of multimedia applications This book presents recent advances in Multimedia Signal Processing and Communications

Linkage in Evolutionary Computation Ying-ping Chen, 2008-09-10 In recent years the issue of linkage in GEAs has garnered greater attention and recognition from researchers Conventional approaches that rely much on ad hoc tweaking of parameters to control the

search by balancing the level of exploitation and exploration are grossly inadequate As shown in the work reported here such parameters tweaking based approaches have their limits they can be easily fooled by cases of triviality or peculiarity of the class of problems that the algorithms are designed to handle Furthermore these approaches are usually blind to the interactions between the decision variables thereby disrupting the partial solutions that are being built up along the way
