Time Management : A Study Of Hrd Managers U.B. Singh,2008

Every of us should remember that it is what we do during 24 hours or 86 400 seconds of each day that will ultimately determine how successful one is in his career Time is money It is limited and valuable resource Time is life as measured out in years months days hours minutes and seconds Nothing is more important to human being than using this free gift of time effectively generously and wisely Obviously no one can control time in the sense of shaping it slowing it down or speeding it up But he can apply it economically to the tasks he has to accomplish Time is thus scarcest resource and unless time is managed nothing can be managed Time management should be taken as a fun It should not be a complicated daily chore It should be kept as simple as possible It should be kept as simple as possible If life is planned time is planned automatically Good time planning facilitates quality life Hence time management should be treated as life management There is no need to plan the life because time management is life management In a nutshell everybody should have a time plan For the purpose one should first identify his different roles Each role should first identify his different roles Each role should be allocated some time This plan ideally may be for a week Week should be planned in advance and reviewed one day earlier Such a time management plan should be simple easy understandable and feasible to follow Although the study focuses around the HRD Managers the concept and philosophy is one and same for every successful person
