New Frontiers In Technological Literacy Breaking With The Past:

New Frontiers in Technological Literacy J. Dakers, 2016-04-30 This book attempts to rethink the concept of technological literacy in a modern context not only in terms of a subject area taught in schools but also as an important general concept that all citizens should engage with As this book will illustrate the concept of technological literacy has no universally agreed definition

Reflections on Technology for Educational Practitioners John R. Dakers, Jonas Hallström, Marc J. de Vries, 2020-03-09 *Reflections on Technology for Educational Practitioners* analyzes the use of philosophy of technology in technology education and unpacks the concept of reflective practitioners Donald Schön in the field Philosophy of technology develops ideas and concepts that are valuable for technology education because they show the basic characteristics of technology that are important if technology education is to present a fair image of what technology is Each chapter focuses on the oeuvre of one particular philosopher of which a description is given and then insights are offered about technology as developed by that philosopher and how it has been fruitful for technology education in all its aspects motives for having it in the curriculum goals for technology education content of the curriculum teaching strategies knowledge types taught ways of assessing resources educational research for technology education amongst others

A Collection of Dreams about the Future of Technology Education, 2025-01-27 Aside from celebrating the work of Marc J de Vries this book also highlights the need for further work effort and energy to improve learning about technology It is a collection of essays written by experts from the philosophy of technology and education They have written about their perspectives on how a future education about technology must better relate to the technologically textured world we now inhabit a world in which the continuing exponential evolution of technology is affecting virtually every aspect of our lives This book serves as a clarion call to all those responsible for school based education Contributors are Piet Ankiewicz Frank Banks Moshe Barak Hilda Ruth Beaumont Dennis Cheek Osnat Dagan John R Dakers Wendy Dakers Marc J de Vries Christian Detweiler Andrew Doyle Wendy Fox Turnbull Lena Gumaelius Jonas Hallström Alison Hardy Eva Hartell Pasi Ikonen Henk Jochemsen Alister Jones Hanna Kauppinen Steve Keirl Richard Kimbell Dov Kipperman Roel Kuiper Mike Martin David Mioduser Carl Mitcham Sonja Niiranen Charlotta Nordlöff Aki Räsänen Philip A Reed Timo Rissanen John M Ritz Marion Rutland Elwin Savelsbergh Alice Schut David Spendlove Kay Stables Kendall N Starkweather Maarten van der Sanden Gerald van Dijk and Maarten J Verkerk

Standards-Based Technology and Engineering Education Scott R. Bartholomew, Marie Hoepfl, P. John Williams, 2023-11-01 This book brings together authors from around the world to discuss the Standards for Technological and Engineering Literacy The Role of Technology and Engineering in STEM Education STEL released in July 2020 by the International Technology and Engineering Educators Association ITEEA The various chapters examine and elaborate on how educators must understand the structure of the standards used and their alignment with educational programs at specific levels and contexts both in the context of the USA and internationally It also showcases case

studies analyzing the use of standards in their various contexts from a number of countries which have either adapted STEL or which have national Standards in Technology Education The STEL represents a major update to the content standards that has guided the field of technology education and later technology and engineering education in the USA since 2000 In contrast to previous standards STEL presents a substantial reduction in the number of standards and associated benchmarks and the benchmarks have been operationalized to identify the key knowledge skills and dispositions associated with each standard It also emphasizes a focus on core standards that should allow for deeper levels of understanding and engagement on the part of students who in comprehensive educational programs will continue to revisit these core standards in increasingly sophisticated ways as they progress from Pre K through Grade 12 [A Nomadic Pedagogy about Technology](#)

John R. Dakers,2022-11-21 Although technology education is in desperate need of reform the new refuses to be born Despite the introduction of technological literacy the evolving merger with science mathematics and engineering STEM and even a proposed merger between STEM and the arts STEAM nothing has changed The subject continues to be a craft based vocationally orientated subject Human beings have always had a relationship with technology but never before has the progression of technological development had such an impact on the environment one which has led to the birth of the Anthropocene This poses the greatest existential threat ever known to the future of human existence Those in power continue to turn a blind eye to this threat Moreover technology education today does not reflect issues relating to our technologically textured lifeworld Given that it is the young who will inherit this potentially dystopic future they must be given a voice one in which they can reimagine their futures in a sustainable way This book explores the development of ethnotechnological literacy as delivered by a radical new nomadic pedagogy inspired by the philosophy of Deleuze and Guattari one that can enable these voices to be expressed and more importantly to be heard **Science and Technology**

Education and Communication Maarten C. A. van der Sanden,Marc J. de Vries,2016-11-25 Science technology education on the one hand and communication on the other are to a large extent still separate worlds and many opportunities for synergy and cross fertilisation are yet unused This divide is unfortunate since educators need communication skills and communicators often use aspects of education in their strategies Moreover innovation processes in both domains ask for education and communication insights and skills Therefore scholars and practitioners in both domains must seek connections and synergy by exchanging insights and ideas This book discusses the shared aims of science technology education and communication such as science literacy and engagement as well as common processes and challenges such as social learning social design and professionalisation and assessment Aims processes and challenges that inspire enhance and deepen the education and communication synergy from a theoretical and practical side If one reads the various chapters and reflects on them from one's own perspective as a scholar or practitioner the question is no longer if cross fertilisation and synergy are needed but when are we seriously going to take up this challenge together This book aims to initiate the dialogue that the

situation in the development of the topic requires at this point

Critique in Design and Technology Education P John Williams, Kay Stables, 2017-02-21 This book addresses notions of critique in Design and Technology Education facilitating a conceptual and practical understanding of critique and enabling both a personal and pedagogical application to practice Critique can be a frame of mind and may be related to a technology product process or material In a holistic sense critique is an element of a person's technological literacy a fundamentally critical disposition brought to bear on all things technological This book provides a reasoned conceptual framework within which to develop critique and examples of applying the framework to Design and Technology Education The book builds on *The Future of Technology Education* published by Springer as the first in the series *Contemporary Issues in Technology Education* In the 21st century an age of knowledge students are called upon to access analyse and evaluate constantly changing information to support personal and workplace decision making and on going innovation A critical Design and Technology Education has an important role to play providing students with opportunities to integrate economic environmental social and technological worlds as they develop and refine their technological literacy Through the design and development of technology they collaborate evaluate and critically apply information developing cognitive and manipulative skills appropriate to the 21st century Critique goes beyond review or analysis addressing positive and negative technological development This book discusses and applies this deeper perspective identifying a clear role for critique in the context of Design and Technology Education

Technologies for Children Marilyn Fleer, 2016-06-02 *Technologies for Children* presents a comprehensive array of contextual examples for teaching design and technology to children from birth to twelve years Aligning with the Australian Curriculum *Technologies* this book focuses predominantly on design technologies with special reference to digital technologies It provides both theory and practical ideas for teaching infants toddlers preschoolers and primary children Each chapter explores a different approach to teaching technologies education along with elements of planning such as project management achievement standards and pedagogy *Technologies for Children* provides a framework for critiquing these approaches in order to make informed choices about them Drawing on over 25 years of experience Marilyn Fleer presents clear approaches that are readily applicable in the classroom and equips students with the necessary skills and knowledge for teaching design and technology education in Australia

What Is Art Education? Jan Jagodzinski, 2016-12-27 This edited book gathers seven established art educators educator artists who address art education from the philosophical position of Deleuze and Guattari This book raises questions as to where the future of art and its education might be heading if the focus on art was to be repositioned along Deleuze and Guattari's philosophy of immanence The chapters are speculative as they query what is thinking in the art process There is an attempt to project other forms of what art can do and the curriculum that can emerge when a student centered problematic is explored along such lines
