Health Promotion in Schools, Universities, Workplaces, and Communities Graça S. Carvalho, Emily Darlington, Teresa Vilaça, 2024-12-17 Health education well being improvement and advocacy are effective health promotion strategies among cutting edge Public Health practices Salutogenic perspectives rooted in ecological models have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health It is imperative to shift from targeting protective or risk factors which have linear causal relationships with health conditions and or comorbidities and encompass a systemic understanding of the role of health determinants in creating health Individual collective and structural ecological approaches can better reduce health inequities Moreover engaging the presumed beneficiaries from such strategies ensures that actual needs are identified and choices are context specific It improves the whole implementation process as well as its results Higher levels of participation such as co creation imply a bottom up voluntary collaborative process rooted in values of diversity mutual trust openness autonomy freedom and respect as well as shared expertise responsibility and decision making which are essential values in co creating health promotion
