

Bacon's SAFETY TIPS

FALL CLEARANCE

Keeping the Splat out of Fall Protection

Before you rely on a **Personal Fall Arrest System**, make sure you know the **Required Fall Clearance Distance**:

TD	Total Distance from anchor to nearest obstruction.
RD	Required Distance must be less than TD or Splat Happens.
LL	Length of Lanyard that is being used.
DD	Deceleration Distance is the elongation of the deceleration device when deployed. (customary to use 3.5 feet when calculation)
HH	Height of Suspended Worker is the distance from the workers feet to D-Ring. (take into account worker's height as well)
C	Safety Factor is the distance from obstruction after a fall. You must include 1.5 feet for required clearance and an additional 1 foot for D-Ring Movement and material stretch, totaling 2.5 feet.

Here's How to Calculate Fall Clearance:

$$LL + DD (3.5 \text{ ft}) + HH + C (2.5 \text{ ft}) = RD$$

(RD must be less than TD)

In order for Self-Retracting Lifelines to meet ANSI requirements, SRLs must activate and stop within 4.5 feet. There are always variables that need to be taken into consideration such as free fall distance, deceleration distance, Back D-Ring height and D-Ring shift.

Don't take chances!

Always survey the risks & make sure you have the right equipment for the job !

How to Get Followers on Twitter

Steve Burns, 2011-08. While other books will tell you all about how to use Twitter, how to set up a profile, and inform you of the overwhelming amount of applications available to use with your Twitter account, this Twitter book is only about one thing: how to get and keep followers. The purpose of this book is to give Twitter users who are frustrated with their small followings 100 ideas to help them build their following. By using the ideas found in this book consistently over a period of time, it is possible to acquire 1000 followers. If you follow the principles of this book, you will see your followers grow. These are not my theories or opinions; these are the actual ideas I used to build my own Twitter following to over 5000 in less than one year. Twitter has been a great help to me in both connecting with like-minded people and collaborating on business projects. Twitter was also the main outlet for promotions for my two published books that both reached the top 5% of all books sold on Amazon. I have helped others by sharing these ideas, and I believe it will work for the readers of this book if they are patient and work on using these suggestions while also building a high quality Twitter account through quality tweets. Use the ideas that fit your Twitter goals and personality and skip the ones you do not like. I believe everyone will find enough tips in this book to gain a substantial following of people who want to hear what you have to say.
