**Wolt Cooperation Strategy with its Couriers before and after the Covid 19 Pandemic** Ekundayo Bello, 2024-05-15 Master's Thesis from the year 2024 in the subject Business economics Business Management Corporate Governance grade 2 course Master in International Business language English abstract The objective of this study is to provide recommendations on how to improve the cooperation between Wolt and its courier partners during and after the Covid 19 crisis based on the views and opinions expressed by the courier partners in Tallinn The views and opinions of Wolt's courier partners on actions and strategies implemented by Wolt during the pandemic and preferred relationship status will be used to make suggestions on how to improve the cooperation between the two parties According to Statista an online database food delivery platforms along with other service sector businesses in Estonia contributed significantly to GDP over 61% from 2009 to 2019 Moreover the global turnover of 151 526 million in 2021 was forecast in the sector Online Food Delivery with China expected to generate the highest turnover and the estimated turnover for Estonia in 2021 is 20 million Statista 2020 1 Wolt one of the largest e-residency companies in Estonia contributes significantly to the Estonian economy by paying social contributions on behalf of its individual courier partners and paying business courier partners a higher commission to compensate for their tax expenses By the last quarter of 2020 Wolt has paid up to EUR 300 000 in taxes for its courier partners in Estonia Therefore the continued survival and profitability of online food delivery platforms in Estonia is important for the well-being of citizens As the hardship caused by the pandemic continues to transform almost all aspects of human life worldwide the role of online food delivery companies in providing consumers with prepared food cannot be

overstated *Platform Engineering and Security* Kuldeep Singh Tomar, Govindarajan Vishnuchithan, 2025-09-16

DESCRIPTION Modern software delivery faces growing complexities from managing diverse cloud environments to ensuring security and compliance. Platform engineering has emerged as the solution, creating a secure, efficient path for developers. This book will help you understand this approach and build the tools necessary to streamline your software lifecycle. This book walks you through the essential components of a platform. You will begin by learning the foundational concepts of platform engineering, understanding the culture and product mindset, and designing a robust architecture. It will show you how to codify infrastructure and security using policy as code, with a special focus on leveraging Kubernetes as the core of a secure delivery platform. You will also learn to embed security through the shift left approach and the creation of self-service capabilities. The book concludes with insights into observability, data lakes, and the future of the field with AI, ML, and DevOps. By the end of this book, you will develop an understanding of platform engineering along with the practical knowledge required to build, manage, and optimize a secure software delivery platform. You will be equipped with the practical knowledge to reduce developer cognitive load, accelerate product development, and ensure consistent security and governance, transforming your organization's approach to software delivery.

WHAT YOU WILL LEARN

- Learn to transition from DevOps to a developer-centric product mindset.
- Implement a shift-left DevSecOps approach to secure pipelines.
- Understand how to codify infrastructure and security using policy as code.
- Build and operate secure infrastructure platforms.
- Transition from DevOps to automated everything-as-code.
- Design internal developer platform architecture and manage policy as code automation.
- Reduce cloud-native complexity with a containerization platform and best practices.
- Reduce the complexity of infrastructure provisioning.
- Learn about policy requirements and governance in SDLC.
