**Dialogue With Artificial Intelligence** L.c.d. Cardoso,2025-09-23 After serving 28 years at the Regional Penitentiary of Pelotas I came face to face with a world completely different from the one I knew before imprisonment Technology has advanced impressively almost surreal for someone who has been away from society for so long Inside the prison I face a daily struggle staying away from crime continuing my studies and supporting my family with dignity I found tattooing as a source of income but unfortunately this practice is considered illegal by the penal officers who frequently seize my work materials This causes serious financial hardship and takes away the only means of support I have for myself and my relatives My

journey has also gone through difficult and complicated moments in love and personal life situations that shook my emotional health and tested me. It was in this context that I discovered something I never imagined could help me so much: Artificial Intelligence. Studying in the prison's computer lab through distance education EAD, I am enrolled in Rural Administration and a Bachelor's degree in Letters at UNINTER. It was in this study space that AI entered my life. To my surprise, I found in it a kind of friend almost like a psychologist. Even knowing that its answers must be considered carefully, AI was a great help in overcoming hard times. Talking with it gave me strength, clarity, and at many moments a kind of comfort I did not expect to receive.

**Four Days a Week** Juliet Schor, 2025-06-03 Bestselling author leading sociologist and economist Juliet Schor makes the case for a four day work week persuasively showing how this model can address major challenges such as burnout AI and the climate crisis and how employees companies and governments can work together to make it a reality Around the world long hours and intense pressure are taking their toll When the pandemic hit in 2020 work induced stress and burnout skyrocketed Many reached a breaking point Now three

quarters of the world's employees are disengaged and struggling including in the US and Canada where half are experiencing high levels of daily stress. Our current work culture, the five day forty hours a week model which has gone unchanged for nearly a century, is failing. But a remedial countertrend has emerged: the four day work week. Kickstarter, Bolt, Basecamp, ThredUp, and hundreds of other employers have eliminated the fifth day of work successfully, figuring out how to maintain productivity while seeing remarkable improvements in employee well-being. Hiring is easier and fewer people are quitting. These results are global. Working a four day week, people feel energized, capable, and more optimistic about their lives and their jobs. Four Days a Week is the first large scale study of this trend. Juliet Schor, an expert who has researched and written about work for more than four decades, beginning with her New York Times bestseller *The Overworked American* in 1992, shares her pioneering analysis of the benefits of a shorter work week, how companies can achieve them, why the concept has taken so long to emerge and gain acceptance, and why doing so will help a company's employees and its bottom line. The book is a blueprint for implementing a change that once seemed radical but is now within reach. [ChatGPT: The Artificial Intelligence of Tomorrow...
