**Social Media Tools and Platforms in Learning Environments** Bebo White, Irwin King, Philip Tsang, 2011-09-20 Online social media have transformed the face of human interaction in the 21st century Wikis blogs online groups and forums podcasts virtual worlds and social tagging are but a few of the applications enabling innovative behaviors that support acquisition access manipulation retrieval and visualization of information It is therefore no surprise that educational practitioners and theorists have begun to explore how social media can be harnessed to describe and implement new paradigms for communication learning and education The editors goal in publishing this book was to identify original research on the application of online social media and related technologies in education as well as emerging applications in Web technologies that could provide and shape future educational platforms The selected contributions deal with questions such as how social media can truly enrich and enhance learning and teaching experiences in ways not otherwise possible how learning can be integrated in a distributed and ubiquitous social computing environment or what theories paradigms and models are applicable for the support of social computing in education Researchers in education or educational software will find interesting and sometimes provocative chapters on paradigms and methodologies virtual and mobile learning spaces and assessment and social factors Practitioners in these fields will benefit from an additional section devoted to case studies and first experience reports

**Using Online Data to Understand Personal and Public Health Outcomes and Behaviors** ,2023-04-05 *Ad sensory Financialisation* Pamela Odih, 2016-09-23 Ad sensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of ad sensory technologies It argues that a paradoxical feature of ad sensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Ad sensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which

dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantial technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimulating the limits of financialisation are beginning to emerge
