Negotiating Global Health Policies Germán Velásquez, 2025-08-29 This book presents reflections and research that highlight tensions in the ongoing negotiations on pandemic preparedness treaties and revisions to the International Health Regulations underscoring the geopolitical divide between developed and developing countries It advocates regional health initiatives as a response to the multilateral impasse and reflects on the erosion of foundational public health concepts such as essential medicines New pandemics are inevitable How can we best prepare for them and above all how can we avoid the mistakes and injustices made during the COVID 19 pandemic Negotiations are underway to formulate a binding international treaty on prevention and preparedness to ensure fairer responses to future pandemics This book is intended as a critical contribution to the current debates How can equitable access to medicines and diagnostics be guaranteed when they are produced in a small number of countries How can we explain the fact that current funding for cooperation in the field of health is in the hands of a small group of Northern countries and foundations from the North How can the role of the World Health Organization be strengthened WHO now plays only a minor role in coordinating public health policies How is it that the concept of essential medicines a major advance in public health policy is being replaced by that of medical countermeasures a term more in line with the private sectors Preparing for future pandemics forces us to ask ourselves how can we safeguard the general interest the defense of human rights and public health *Negotiating Global Health Policies Tensions and Dilemmas* is essential reading for negotiators from the 194 member countries of the World Health Organization WHO the World Trade Organization WTO and the World Intellectual Property Organization WIPO who participate in international negotiations on health and development Academics and students of medicine health sciences law sociology and political science as well as intergovernmental organizations and non governmental organizations who work on access to medicines and global health issues also would find the book of interest

Food and Nutrition Danielle Gallegos, Naiyana Wattanapenpaiboon, Mark L. Wahlqvist, 2026-02-12 Through the prism of public health climate change and global sustainability the fifth edition of this long standing textbook provides a comprehensive understanding of diet nutrition and the place of food and food production within the broader ecosystem Now framed through an international perspective the book gives a detailed overview of food components and the biochemistry of foods and digestion outlining nutrition needs across the life span as well as dietary disorders But unlike other textbooks in the field it also connects the human body to the complex and dynamic systems of our environment as well as the social and cultural influences on food selection and consumption Updated to cover issues such as food labelling the determinants of eating and sustainable diets it also explores the increasing influence of technology on agriculture and food preparation and the recent research into intergenerational nutrition and nutrigenomics Extensively illustrated with informative graphs diagrams and data and with examples glossaries and reflective exercises *Food and Nutrition* is the ideal introduction to the field of nutrition dietetics and sustainability and a
