Metaverse in Education A Practical Guide explores the transformative potential of the metaverse in education. This book defines four types of metaverses and examines their pedagogical applications and limitations. The Metaverse Roadmap categorizes these applications into Augmented Reality AR, Anatomy Methodologies and Virtual Reality VR. We delve into real world examples such as AR T shirts in medical education that allow students to explore the human body and a spinal surgery platform developed by Seoul Hospital using AR technology. The book highlights the potential of the metaverse as a new educational environment offering immersive experiences and enhanced social communication. However, the book also addresses potential challenges such as weak social connections, privacy concerns and the risk of crimes due to anonymity in virtual spaces. We emphasize the importance of carefully analyzing how students understand the metaverse and designing classes that encourage creative problem solving and collaboration. Using the Metaverse in Education A Practical Guide is a comprehensive resource for educators looking to harness the metaverse's potential while mitigating its challenges. **Asia**

Many of the stories take place in the deepest parts of the woods on the shadowy border between reality and fairytale. Others take place on the streets of Vancouver in a whispering circle of ancient stones on a high tor and backstage at a rock concert. Here a mother's vivid dreams are haunted by the ever present specter of a freight train. A grandmother disappears from her nursing home and only her granddaughter knows that she has disappeared into her own fairytale. In a village inhabited by humans and wolves a girl rebels by turning herself into a cub. A woman searches for her three children, facing her own doubts about whether she wants to be their mother. A dog traverses a post apocalyptic landscape to save its pups. Another dog travels to the underworld in search of his lost girl. In a Canadian basement two friends play a game that changes one of them into a terrifying creature. Two women trying to defeat an ancient entity must first face down a world famous rock star. A string of mysterious deaths across the solar system pits two friends against each other at the bottom of the North Sea. And in a stark landscape riven by magic and myth an old Viking warrior is haunted by visions of dragons as she searches for her abducted son. In each of these
