Demonic Deals M. W. McLeod, 2023-08-08 Desperate to speak with her dead father to locate her family's missing spell book Ellyria researches a ritual on the internet. Now bound to a grumbly demon who won't stop talking about how this assignment is below his stature she must unravel more family secrets and learn how to work with her new demonic protector before the men who killed her father come for her next. This book was originally published as Covenant Book 1 of the Terms and Conditions trilogy.

Bait and Switch Anastasia Abraham, Amílcar Antonio Barreto, 2024-05-20 Exclusionary notions of American national identity have been endemic since the country's founding. Since the Culture Wars they have returned with vengeance. One of their champions is a new generation of tech savvy activists known as the Alt Right. This is a movement that embraces a vision of America that is unapologetically white and Christian, supremacist, misogynistic and xenophobic. Rather than see the Alt Right as an outlier the authors of this book treat it as an integral part of an endemic battler over the articulation of American national identity. Critically what distinguishes these cyber warriors from other far right movements is their rhetorical style. Their far right counterparts employ muscular rhetoric and demand the right to dominate. The Alt Right on the other hand has opted for a weapons of the weak strategy and accuses adversaries of persecuting them. Embracing a cult of victimhood this shift in rhetorical tactic is not only a matter of gaslighting its goal is to justify potential acts of violence.

Folksonomies Isabella Peters, 2009 Collaborative information services on Web 2.0 are used by Internet users to produce digital information resources and to furnish the contents of the resources with their own keywords so called tags. This book deals with collaborative information services and folksonomies as a method of representing knowledge and a tool for information retrieval. Collaborative information services on Web 2.0 are used by Internet users not only to produce digital information resources but also to furnish the contents of the resources with their own keywords so called tags. Whilst doing so the user is not required to comply with rules as is necessary with a library catalogue. The amount of user generated tags in a collaborative information service is referred to as folksonomy. Folksonomies allow users to relocate their own resources and to search for other resources. This book deals with collaborative information services and folksonomies both as a method of representing knowledge and a tool for information retrieval.
