## WHICH IS CHEAPER (AND BY HOW MUCH) IN EVERY STATE?

Ride-hailing apps have revolutionized the way we get around, and according to Statista, only two such companies make up the American market in 2022: Uber and Lyft. But which of these ride-share titans offers the better rate?

We calculated the average fare for a trip in every U.S. state and discovered that **Uber is cheaper than Lyft in the majority (33) of states**. **Wisconsin** sees the biggest difference: **Uber is \$4.71 cheaper than Lyft**.

The libertarian commentator and rising media star Kristin Tate takes us on a tour of the ways the government bleeds us dry in innumerable daily transactions and at various stages of life. We all know the government taxes our pay federal state and local taxes are withheld by employers as are social security payments. But what about the many other ways the government drains money from our wallets? Have you studied your cell phone bill? Customers in New York State pay an average of 24.36% in federal state and local taxes on their wireless bills. They're also charged for obscure services they didn't ask for and don't understand like a universal service fund fee, an FCC compliance fee, a line service fee and an emergency services fee. These aren't taxes strictly speaking. The government imposes these administrative and regulatory costs and your wireless provider passes them along to you. But the effect is exactly the same. What about your cable bill? Your power bill? Your water bill? The cost of a gallon of gas, a cab ride, a hotel stay and a movie ticket are all inflated by hidden fees. How much of what you pay at the pump, the box office or the airport is really an indirect tax? In a series of short, pointed fact-laden, humorous chapters, Tate exposes the vast government shakedown that consumes up to half of your income and also explains where these hidden fees and taxes come from.

**Design, Control, Predict** Aaron Shapiro, 2020-12-15. An in-depth look at life in the smart city. Technology has fundamentally transformed urban life. But today's smart cities look little like what experts had predicted. Aaron Shapiro shows us the true face of the revolution in urban technology, taking the reader on a tour of today's smart city. Along the way, he develops a new lens for interpreting urban technologies, logistical governance, to critique an urban future based on extraction and rationalization. Through ethnographic research, journalistic interviews, and his own hands-on experience, Shapiro helps us peer through cracks in the smart city's facade. He investigates the true price New Yorkers pay for free ad-funded WiFi, finding that it ultimately serves the ends of commercial media. He also builds on his experience as a bike courier for a food delivery startup to examine how promises of flexible employment in the gig economy in fact pave the way for strict managerial control. And he turns his eye toward hot button debates around police violence and new patrol technologies, asking whether algorithms are really the answer to reforming our cities' ongoing crises of criminal justice. Through these gripping accounts of the new technological urbanism, *Design, Control, Predict* makes vital contributions to conversations.

around data privacy and algorithmic governance Shapiro brings much needed empirical research to a field that has often relied on 10 000 foot views Timely important and expertly researched Design Control Predict doesn t just help us comprehend urbanism today it advances strategies for critiquing and resisting a dystopian future that can seem inevitable
