MLB Playoffs Comparison

Jim Albert, Ruud H. Koning

MLB Playoffs Comparison:

International Sports Economics Comparisons Rodney D. Fort, John L. Fizel, 2004-03-30 This book brings together for the first time under a single cover international comparisons of the major topics in sports economics. Contributors are all renowned scholars of the international sports scene in Australia, New Zealand, Brazil, the Pacific Rim, North America, and Europe. The reader will find an overview of sports in particular countries and regions along with comparisons along the major topics of economic importance. In particular, the contributions compare and contrast revenues and costs, labor markets, restrictions and discrimination, market structures, league and association organizations, and outcomes, team profitability, and competitive balance and policy issues, especially competition policy. Aimed primarily at sports scholars, practicing sports professionals, and policymakers, the volume is also well suited for undergraduate sports economics, sports management, and sports law courses.

Statistical Thinking in Sports Jim Albert, Ruud H. Koning, 2007-07-12 Since the first athletic events found a fan base, sports and statistics have always maintained a tight and at times mythical relationship. As a way to relay the telling of a game's drama and attest to the prodigious powers of the heroes involved, those reporting on the games tallied up the numbers that they believe best described the action and beat.

Baseball's Revenue Gap United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust, Business Rights, and Competition, 2001

The Sports

Business in The Pacific Rim Young Hoon Lee, Rodney Fort, 2014-10-31 Following consistent and rapid general economic growth, Pacific Rim countries have grown as a major force in sports. Australia, China, Japan, and Korea populated the top ten medals list at the 2012 London Olympics. Pacific Rim countries are major consumers of international sports and domestic professional sports have expanded continuously over time. Nippon Professional Baseball and the Korean Baseball

Organization are the second and third largest baseball leagues measured by attendance and revenue following Major League Baseball in the U.S. This book also includes event studies of team ownership, assessment of human capital markets, analysis of the relationship between attendance and competitive balance, the components of fan demand in common the world over, and business decisions concerning attendance and pricing. There is already demand for comprehensive study of the sports business in the Pacific Rim as witnessed by this growth. This book will be of interest of researchers studying and/or teaching in the fields of sports economics and sports management as well as a general audience interested in business governance around the world.
