New Rules of Sociological Method Anthony Giddens,1984 **New Rules of Sociological Method** Anthony Giddens,2013-06-10 This is a new and revised edition of a book which has already established itself as a basic text in social theory The first section of the work provides a concise critical analysis of some leading schools of thought in social philosophy giving particular attention to phenomenology ethnomethodology and Wittgensteinian thought Giddens concentrates primarily upon the implications of these various perspectives for an account of human action and its intelligibility An action approach on its own however will not do in human social life action and structure presuppose one another The author therefore moves on to provide a series of concepts relevant to understanding the production and reproduction of society The book concludes with a succinct statement of some new rules of sociological method Representing the first and most trenchant exposition of the principles of structuration theory this edition also contains a substantial new Introduction in which Giddens replies to some of the more persistent criticisms made of the original version and also addresses some important issues originally discussed only in a cursory way

Security, Identity and Interests Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy

Sociological Theory and Collective Subjectivity J. Domingues, 1995-11-01 The main theme of this book is collective subjectivity analysed especially in connection with the work of Marx Parsons Giddens and Habermas but also addressing the manifold tendencies of sociological theory from its inception to the present The book supports the idea that there is a conceptual shortcoming in the most relevant contemporary research programs in sociological theory despite some recent efforts to re develop concepts of collective actor class or social movement After the fragmentation of the sixties a number of syncretical approaches emerged Some writers such as Touraine Laclau and Mouffe Olson Coleman Hindess Mouzelis and Eder have proposed some versions of concepts of collective subjectivity focusing on collective actors classes genders social movements organisations and collective utilitarian action But they do not in terms of general conceptual construction go further than Parsons and Marx they often fail to match their original formulations The concept of collective subjectivity is introduced to bring together these diverse approaches which are synthesised and receive a more general definition Moreover this new concept is directly linked to those contemporary syntheses

Discrimination Isn t there enough talk about discrimination Yes indeed That is why we have to begin countering discrimination We need strategies that will make it inoperative or at least limit its scope But first we need to think how discrimination works and identify it where it works It concerns far more than mere procedural hitches for which a few legal provisions will do Countering Discrimination Volume 1998 of International Perspectives in Social Work yearbook brings papers that analyse mechanisms of social discrimination in a variety of such locations and bring proposals for counter strategies This is essential in social work if causes rather than manifestations of the problems it is concerned with are to be

addressed But it is also essential that everybody who opposes discrimination recognise its subtle and dispersed ways of operation in the human services regardless of their own basic field of work In this respect the book will be useful to a very wide audience
