Albright**

Nice End Airports Christopher Schaberg:

The End of Airports Christopher Schaberg, 2015-11-19 If air travel was once the bold future it has now settled into a mundane on going present We no longer expect romantic experiences or sublime views but just hope that we get from here to there with minimal hassle In *The End of Airports* Christopher Schaberg suggests that even as the epoch of flight approaches a threshold of banality there are still mysteries to be unraveled around our aircraft and airfields Drawing from his own experiences working at an airport as well as interpreting these spaces from the perspective of a cultural critic Schaberg explores the secret lives of jet bridges seating areas concourses and tarmac vehicles showing how the ordinary objects of flight call for wonder and inquiry *The End of Airports* is not an obituary it s more like an ode to terminals in the digital age

Imagining Urban Complexity Frans-Willem Korsten, Anthony T. Albright, 2024-07-30 *Imagining Urban Complexity* introduces passionate and critical perspectives on the link between the humanities and urban studies It emphasizes tropes media and genres as cultural techniques that shape complexity in urban environments by distributing affordances modes of sensing and modes of sense making Focusing on urban political and cultural dynamics in 24 global cities the book shows that urban environments are thematized in literature and art but are also entities that are shaped perceived interpreted and experienced through sense making techniques that have long been central concerns of the humanities These techniques the book argues activate a dialectic between urban imaginations and cancellations Tropes media and genres are aesthetically and politically powerful they propel imaginations and open up multiplicities of urban possibilities they naturalize actualized orders and they cancel alternatives The book moves between close readings of city spaces and more systemic and infrastructural approaches to urban environments providing tools and strategies that can be adapted and extended to understand urban complexity in different cultural and political contexts The book speaks to global audiences from a continental philosophical tradition It is relevant to undergraduates postgraduates and academic researchers in the fields of critical urban studies urban design comparative literature cultural studies cultural analysis ecocriticism political theory and ethics

Adventure Christopher Schaberg, 2023-07-13 What is the meaning of adventure as we enter the third decade of the 21st century after a global pandemic social and geopolitical calamities and accelerating environmental catastrophes What stories are humans telling about wilderness remote destinations and the most difficult thoughts thinkable *Adventure* is a pinball assortment of unexpected encounters Each chapter entertains a specific project fantasy or activity that dabbles with adventure and runs into limits Subjects range from Mars exploration commercial space tourism and adventure consumerism to the day to day experiences of living in a world increasingly impacted by climate change and environmental disasters Taking a wide angle view at times personal at others theoretical Schaberg explores our ideas about adventure and their narrative cultural and philosophical underpinnings

The Textual Life of Airports Christopher Schaberg, 2012-02-02 From the earliest airfields to the post 9 11 turn this book investigates how airports figure

in the American cultural imagination *Airportness* Christopher Schaberg, 2017-09-21 *Airportness* takes the reader on a single day's journey through all the routines and stages of an ordinary flight. From curbside to baggage and pondering the minutes and hours of sitting in between, Christopher Schaberg contemplates the mundane world of commercial aviation to discover the nature of flight. For Schaberg, this means hearing planes in the sky, recognizing airline symbols in unlikely places, and navigating the various zones of transit from sliding doors to jet bridge to lavatory. It is an ongoing, swarming ecosystem that unfolds each day as we fly, get stranded, and arrive at our destinations. *Airportness* turns out to be more than just architecture and design elements; rather, it is all the rumble and buzz of flight, the tedium of travel, as well as the feelings of uplift.

Air Travel Fiction and Film Erica Durante, 2020-08-03 *Air Travel Fiction and Film: Cloud People* explores how over the past four decades, fiction and film have transformed our perceptions and representations of contemporary air travel. Adopting an interdisciplinary approach, the book provides a comprehensive analysis of a wide range of international cultural productions and elucidates the paradigms and narratives that constitute our current imaginary of air mobility. Erica Durante advances the hypothesis that fiction and film have converted the Airworld, the world of airplanes and airport infrastructures, into a pivotal anthropological place that is endowed with social significance and identity, suggesting that the assimilation of the sky into our cultural imaginary and lifestyle has metamorphosed human society into Cloud People. In its examination of the representations of air travel as an epicenter of today's world, the book not only illustrates a novel perspective on contemporary fiction but fills an important gap in the study of globalization within literary and film studies.

Veer Ecology Jeffrey Jerome Cohen, Lowell Duckert, 2017-12-15 The words most commonly associated with the environmental movement—save, recycle, reuse, protect, regulate, restore—describe what we can do to help the environment, but few suggest how we might transform ourselves to better navigate the sudden turns of the late Anthropocene. Which words can help us to veer conceptually along with drastic environmental flux? Jeffrey Jerome Cohen and Lowell Duckert asked thirty brilliant thinkers to each propose one verb that stresses the forceful potential of inquiry, weather, biomes, apprehensions, and desires to swerve and sheer. Each term is accompanied by a concise essay contextualizing its meaning in times of resource depletion, environmental degradation, and global climate change. Some verbs are closely tied to natural processes: compost, saturate, seep, rain, shade, sediment, vegetate, environ. Many are vaguely unsettling: drown, unmoor, obsolesce, power down, haunt. Others are enigmatic or counterintuitive: curl, globalize, commodify, ape, whirl. And while several verbs pertain to human affect and action: love, represent, behold, wait, try, attune, play, remember, decorate, tend, hope. A primary goal of *Veer Ecology* is to decenter the human. Indeed, each of the essays speaks to a heightened sense of possibility, awakening our imaginations and inviting us to think the world anew from radically different perspectives. A groundbreaking guide for the twenty-first century, *Veer Ecology* foregrounds the risks and potentialities of living on and with an alarmingly dynamic planet.
