Neural Implementations of Expertise Merim Bilalić, Robert Langner, Guillermo Campitelli, Luca Turella, Wolfgang Grodd, 2015-12-18 When we think about expertise we usually consider people who master tasks at a level not reachable by most other people Although we rarely realise it however most humans are experts in many aspects of everyday life This expertise enables us to find our way through a complex environment that is our life For instance we can instantly recognise multiple objects and relations between them to form a meaningful unit such as an office Thus research on expertise is not only important to investigate the cognitive and neural processes within an elite group but it is also a powerful tool to understand how everyone can acquire complex skills The goal of this Research Topic is to shed further light on the common and distinct neural mechanisms that implement various kinds of expertise We broadly define expertise as skill in any perceptual cognitive social or motor domain with the common core being optimised information processing due to knowledge acquired from repeated experiences Thus we are interested in the full range of

mental processes modulated or modified by expertise from simple object or pattern recognition to complex decision making or problem solving in a particular domain. These domains can range from everyday or occupational expertise to sports and rather artificial domains such as board games. In all cases the aim should be to elucidate how the brain implements these sometimes incredible feats. We are particularly interested in connecting cognitive theories about expertise and expertise related performance differences with models and data on the neural implementation of expertise. We welcome original research contributions using the full range of behavioural neuroscience methods as well as theoretical methodological or historical reviews and opinion papers focusing on any of the above mentioned aspects. The Recipe for Happiness 2.0 Jesper Bay-Hansen, 2024-03-26 Embark on a transformative journey with The Recipe for Happiness 2.0. This groundbreaking exploration grapples with the elusive question: Is there a foolproof formula to happiness? Herein lies an affirmative answer, albeit one that adapts uniquely to each individual and changes along with our shifting circumstances. In times of tranquillity or turmoil, societal stability or unpredictability, your recipe for happiness can transform dramatically and understanding this is essential. The Recipe for Happiness 2.0 enlightens us on how to grasp that sought-after foothold in life even during challenging periods. Jesper Bay Hansen b 1979 is a doctor, a specialist in clinical sexology, and a couples counsellor. He is the owner of a private counselling clinic and gives lectures and courses on desire and happiness.
