[Super Agers](#) Eric Topol, 2025-05-06 A New York Times Bestseller *Super Agers* is a detailed guide to a revolution transforming human longevity. This is a breakthrough moment in the history of human health care. The person making that bold claim is one of the most respected medical researchers in the world, Eric Topol. Dr. Topol's unprecedented, evidenced-based guide is about how you and your family and friends can benefit from new treatments coming available at a faster rate than ever. From his unique position as a leader overseeing millions in research funding, Dr. Topol also explains the fundamental reasons, from semaglutides to AI, that we can be confident these

breakthroughs will continue. Ninety five percent of Americans over sixty have at least one chronic disease and almost as many have two. That is the essential problem this revolution is solving. He explains the power of the new approaches to the worst chronic killers: diabetes, obesity, heart disease, cancer, and neurodegeneration, and how treatments can begin long before middle age and even long after. In thirty years we will have five times as many people at least one hundred years old and they will be healthier than ever because of the breakthroughs. Dr. Topol describes the amazing discoveries Topol brings into sharp focus, which are deeply inspiring about our human potential. We can now realistically see how we can make considerable headway for preventing age-related diseases and may one day be able to slow the body-wide aging process itself. Beyond Training Ben Greenfield, 2014. Ironically, many people who appear to be fit and healthy on the outside struggle with health and lifestyle issues like insomnia, gas, bloating, low libido, aging too fast, injuries, performance plateaus, brain fog, and a basic lack of time for career, family, and friends. So this book supplies a step-by-step guide for you to eliminating all these issues, helping you get the most out of life while still achieving amazing feats of physical performance. My health my responsibility Prashant Karhade, 2024-05-08. Provided you take responsibility for your own health. Why should you do it? Because nobody else is going to. So do it and start your journey to a healthier and happier you today.
