## Uber Vs Customer Service:

**Innovation for Entrepreneurs** Meyer, Marc H., Lee, Chaewon, 2022-04-22 Innovation for Entrepreneurs presents a powerful but easy to apply toolkit for innovation based on Professors Meyer and Lee's decades of experience as company founders and innovators for corporations around the globe. This textbook includes guidance in developing new product and service ideas with genuine impact, building teams around these ideas, understanding customers' needs, translating these needs into compelling product and service designs, and creating initial prototypes. It also helps students learn how to scope and size target markets and position an innovation successfully relative to competitors. These methods are fundamental for any new impactful venture.

*Business Ethics, Seventh Edition* Joseph W. Weiss, 2021-11-23 The seventh edition of this pragmatic guide to determining right and wrong in the workplace is updated with new case studies, exercises, and ancillary materials. Joseph Weiss's *Business Ethics* is a pragmatic hands-on guide for determining right and wrong in the business world. To be socially responsible and ethical, Weiss maintains, businesses must acknowledge the impact their decisions can have on the world beyond their walls. An advantage of the book is the integration of a stakeholder perspective with an issues and crisis management approach so students can look at how a business's actions affect not just share price and profit but the well-being of employees, customers, suppliers, the local community, the larger society, other nations, and the environment. Weiss includes twenty-three cases that immerse students directly in contemporary ethical dilemmas. Eight new cases in this edition include Facebook's mis-use of customer data, the impact of COVID-19 on higher education, the opioid epidemic, the rise of Uber, the rapid growth of AI, safety concerns over the Boeing 737, the Wells Fargo false savings accounts scandal, and plastics being dumped into the ocean. Several chapters feature a unique point-counterpoint exercise that challenges students to argue both sides of a heated ethical issue. This edition has eleven new point-counterpoint exercises addressing questions like: Should tech giants be broken apart? What is the line between free speech and dangerous disinformation? Has the Me Too movement gone too far? As with previous editions, the seventh edition features a complete set of ancillary materials for instructors: teaching guides, test banks, and PowerPoint presentations.

*Exploring Data and Metrics of Value at the Intersection of Health Care and Transportation* National Academies of Sciences, Engineering, and Medicine, Transportation Research Board, Health and Medicine Division, Board on Population Health and Public Health Practice, 2016-12-28 Evidence from the public health sector demonstrates that health care is only one of the determinants of health, which also include genes, behavior, social factors, and the built environment. These contextual elements are key to understanding why health care organizations are motivated to focus beyond their walls and to consider and respond in unprecedented ways to the social needs of patients, including transportation needs. In June 2016, the National Academies of Sciences, Engineering, and Medicine held a joint workshop to explore partnerships, data, and measurement at the intersection of the health care and transportation sectors. This publication summarizes the presentations and discussions from the workshop.
