### **Alternative Protein Source For A Sustainable And Healthy Nutrition** Carla Cavallo,Kathleen L.

Hefferon,2024-08-01 Global socioeconomic systems and climate change exacerbate disparities that leave a huge proportion of the human population malnourished This condition will be further worsened by intensive food production like livestock that produces affordable protein but contribute to increasing greenhouse gases making conventional food sources such as animal livestock unsustainable at global scales in a vicious cycle Thus food systems have come under pressure to meet global food demands whilst having to meet economic and ecological targets

*Smart Food Industry: The Blockchain for Sustainable Engineering* Eduardo Jacob Lopes,Leila Queiroz Zepka,Mariany Costa Deprá,2024-02-13 Smart Food Industry The Blockchain for Sustainable Engineering Volume II Current Status Future Foods and Global Issues reviews the literature and scientific frameworks to present a kind of sustainability compass Disruptive approaches around potential sustainable foods are also widely investigated in order to be an alternative route for the industrial future Thus this book proposes new concepts and strategies to face future sustainability challenges that are on the horizon and can impact the next generation of foods Divided into three parts this book discusses the i status of sustainable food industry ii next generation and future technology for sustainable foods and iii policy social economic and environmental aspects in food industries Given the book's breadth it provides readers with an invaluable reference resource for students researchers graduates and professionals in general who wish to gain knowledge about the engineering and food processing area so as to achieve sustainable food production

**Dead Meat** Elisabeth Abergel,2024-12-05 As we confront the environmental challenges of the Anthropocene cellular agriculture has emerged as a revolutionary technology promising to reshape global food systems Dead Meat offers a critical examination of this biotechnological shift exploring how cultivated meat production reconfigures the relationship between life death and food in the context of competing ecological social and ethical imperatives Elisabeth Abergel provides a compelling analysis of cultivated meat through the lens of competing vitalities questioning how these new forms of food production are narrated and imagined in the Anthropocene She delves into the sociotechnical imaginaries that promise sustainability animal welfare and climate resilience while probing the tensions between these narratives and the political economy of industrial food production Drawing on interdisciplinary perspectives from the environmental humanities science and technology studies political economy and political ecology Abergel critiques the idea that cultivated meat is a simple technological fix to the climate crisis Instead she exposes how these innovations both challenge and reinforce capitalist logics that dominate agricultural systems Dead Meat is essential reading for scholars and students in environmental sociology food politics science and technology studies environmental humanities and political economy as well as for activists and policymakers interested in sustainable food futures and planetary health
