### **Artificial Intelligence, Humans and the Law**

Henrik Palmer Olsen,Jacob Livingston Slosser,Salome Addo Ravn,Johan Eddebo,Jonas Hultin Rosenberg,2025-10-31 This book takes up the contentious issue of artificial intelligence AI and more specifically the evolving nature of AI mindedness as a legal entity in society With the increasing potential of AI suggested by the recent surge in creative and administrative tools and large language models there is a growing concern about the ethical and legal implications of incorporating AI into society As these systems become even more powerful and their ability to mimic human output grows the question of whether and how to attribute mental

states to AI even in its most nascent form has become a pressing concern. It is for example unclear what kind of mind AI might be capable of and therefore what the proper legal analogy might be for how we attribute reasoning capability intent responsibility liability agency and so on to it. This book contributes to this new and important area by bringing together front line research from diverse fields on the topic of understanding AI mindedness and how it and our relationship to it might be regulated. Through a collection of chapters written by experts from law public administration tort psychoanalysis philosophy linguistics computer science and political theory this volume offers an insightful examination of current research theoretical frameworks and practical applications that are shaping the AI human relationship. This book will be of considerable interest to scholars and researchers working in legal theory socio legal studies law and technology and science and technology studies.
