August-Wilhelm Scheer

Foldable Phone Tesla Model Compare:

Novel Highly Flexible Modular Power Electronics for Energy Storage and Conversion Systems Nima Tashakor, 2023-09-04
This book describes improvements to the electronics topology of current modular reconfigurable storages by integrating parallel connectivity reducing the semiconductor count by eliminating irrelevant states and improving the monitoring techniques through higher function integration The author also discusses each topology's main advantages and disadvantages at the micro and macro levels Moreover the presented modeling of modular reconfigurable storage systems with different storages helps in better understanding the dynamics of the system The book establishes novel optimum or near optimum methods for exploiting the DOF degrees of freedom to achieve higher efficiency more function integration better balancing or output quality Additionally through a detailed analysis of different modulation techniques this book presents novel modulation methods enhances the state of the art or in some cases simplifies the complexity of implementation The concept of interconnected multi port systems through integrating novel modulation techniques and the acquired understanding of the behavior of modular dynamically reconfigurable storages is explained The presented concepts can significantly reduce the number of energy conversion stages as well as the final footprint of the system reduce the number of required controlled semiconductors and save costs It also presents novel monitoring techniques based on estimators that can significantly reduce the number of required sensors and the required data communication bandwidth

The Composable Enterprise: Agile, Flexible, Innovative August-Wilhelm Scheer, 2023-11-09 The benefits of digitalisation do not lie in the use of new technologies for existing processes but in organisational changes and new business models The book highlights the composable enterprise as the guiding principle for successful digital transformation and associated cost reductions and revenue increases What does it mean A composable enterprise is organised in a decentralised process oriented way This allows the enterprise to react quickly to new situations develop or change processes and business models The information systems are based on platform architectures A paradigm shift to monolithic applications Sector concepts for industry consulting and universities show how organisation and application architectures interlock in the composable enterprise The reader receives inspiration a foundation and a compass for the digital transformation of a company to the composable enterprise

Microfluidic Mixers for the Investigation of Protein Folding Using Synchrotron Radiation Circular Dichroism Spectroscopy Avinash Sharad Kane, 2008

Strategies for Autonomous, Connected and Smart Mobility in the Automotive Industry. A Comparative Analysis of BMW Group and Tesla Motors Inc. Andreas Kauerhof, 2017-03-09
Master's Thesis from the year 2017 in the subject Business economics Offline Marketing and Online Marketing grade 1.3
University of applied sciences Munich language English abstract The automotive industry is facing the biggest changes in its more than 100 years of existence At the end of this decade the first electric vehicle is going to enter the mass market that can compete on product features comfort and price with the internal combustion engines People keep moving into urban

areas The requirements toward future mobility increase Some countries already decided to prefer electric vehicles to conventional cars Profits will shift to other markets or segments Incumbents must align their current strategies to keep their market share in the future and participate in future profit pools of the automotive industry BMW and Tesla have different strategic approaches to the upcoming changes in the industry BMW as many other OEMs is aware of future challenges and disruptive forces and has much more resources to manage the required investments in R D than smaller start ups However disruptive forces come from lower functionality and low cost products that are usually overlooked by dominant firms in an industry This research analyzes the two automotive companies BMW and Tesla by using the common strategy analysis tools First the firms external environment is analyzed by using the PESTEL analysis describing relevant trends that affect the strategic decision of the two companies An industry overview with future projections is provided Secondly an internal analysis is performed SWOT analysis and the VRIO framework form the basis to define the strengths weaknesses unique recourses and capabilities of BMW and Tesla The conclusion provides an overall discussion of the most important findings emerging from the analysis with regard to the business operations and the existing business models of the two car manufacturers Furthermore important implications for the adaption and adjustment processes are discussed
