**Prepare for Launch** Erik Seedhouse,2018-10-10 Today's astronauts require many different abilities. They must not only be expert in performing flight simulations but must also be proficient in such dissimilar subjects as photography, thermodynamics, electrical repairs, flight procedures, oceanography, public affairs, and geology. In **Prepare for Launch** the author introduces the technologies and myriad activities that constitute or affect astronaut training such as the part task trainers, emergency procedures, the fixed based and motion based simulators, virtual environment training, and the demands of training in the Weightless Environment Training Facility. With plans to return to the Moon and future missions to Mars, the current selection criteria and training are very different from those used for short duration mission Space Shuttle crews. Dr. Erik Seedhouse in this book focuses on how astronaut candidates are taught to cope with different needs and environments, for example hibernation, artificial gravity, and bioethics issues, and also includes brief discussions of the astronaut application and selection process.

*Enhancing Learning with Laptops in the Classroom* Linda B. Nilson, Barbara E. Weaver, 2005-04-20 This issue is the first major publication on teaching with laptops in the classroom. Its primary purpose is to show that university instructors make pedagogically productive and novel use of laptops in the classroom. As the chapters illustrate, laptops indeed offer rich new opportunities to make classes more student active, thereby enhancing student engagement and learning. Moreover, these benefits can accrue without compromising the quality of student-instructor interaction or increasing the student workload. The issue also has a timely secondary purpose to advise institutional leaders on how to make a laptop mandate successful at their university. Clemson University's mandate has met with tremendous and documented success. Their Laptop Faculty Development Program ensures that faculty interested in teaching with laptops receive extensive pedagogical as well as technical training before they take on a laptop course. Some of the more creative and effective laptop faculty are showcased in this volume. This is the 101st issue of the Jossey-Bass quarterly report series *New Directions for Teaching and Learning*.
