food products that naturally offer or have been modified to offer additional health benefits beyond basic nutrition. As such products have surged in popularity in recent years, it is crucial that researchers and manufacturers understand the concepts underpinning functional foods and the opportunity they represent to improve human health, reduce healthcare costs, and support economic development worldwide. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* presents a guide to functional foods from experienced professionals in key institutions around the world. The text provides background information on the health benefits, bioavailability, and safety measurements of functional foods and nutraceuticals. Subsequent chapters detail the bioactive components in functional foods responsible for these health benefits, as well as the different formulations of these products and recent innovations spurred by consumer demands. Authors emphasize product development for increased marketability, taking into account safety issues associated with functional food adulteration and solutions to be found in GMP adherence. Various food preservation methods aimed at enhancing the quality and shelf life of functional food are also highlighted. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* is the first of its kind, designed to be useful to students, teachers, nutritionists, food scientists, food technologists, and public health regulators alike.

Age Less Sandra Parsons, 2025-06-05. The wellness book of the year. Daily Mail. A perfect combination of candid personal insight and scientific research, this highly readable guide covers it all, from cigarettes to jumping jacks. Dr. Flaminia Ronca. When journalist Sandra Parsons suffered a serious back injury in her mid 40s, she knew things had to change. Years of smoking, drinking, and late night takeaways at her desk had taken their toll; she was in pain and she felt well old. In her quest to heal her body, Sandra delved into the science of ageing and was astonished by what she found: that ageing is now considered a treatable disease, and by addressing its root causes, we can turn back the clock and dramatically improve our health. Distilling all the latest medical science and with the help of the world's leading longevity experts, she presents a 3-step plan to embed new ways of eating, moving, and crucially, resting more deeply. The plan is designed to put you on the path to long-term change, but you will feel the effects in a matter of weeks. In a recent test, Sandra discovered that she has a biological age of 20. That's right: 60 on the outside, 20 on the inside. Her plan revolutionised her life, and it will revolutionise yours.

Kaup Shetty, 2017-10-19 What affects our longevity Weight control with a balanced diet regular exercise and social
interaction in old age extends life span No medication is shown to extend longevity but statins in cardiovascular disease CVD
and metformin in metabolic syndrome may prolong life Vitamins and antioxidants in pill form seem to increase the incidence
of CVD and cancer as excess may stimulate cells Our diet has adequate vitamin D and calcium experts advocate against over
treatment Fish oil does not seem to prevent heart attacks and strokes Indiscriminate cancer screening is harmful and leads
to over diagnosis and over treatment Immunotherapy against cancer is a major advancement Growth hormone testosterone
