your baby from his cute little head to his teeny tiny toenails. How Much Do Babies Eat? No matter how prepared you think you are, you'll still have questions once your newborn arrives. One of the most common worries new parents have: Whether their little one is eating the right amount. Every baby is unique but there are some basic guidelines to keep in mind when it's time for a feeding. How Much Do Babies Eat? Newborn to 2 months: During their first month, babies need to eat 8-12 times each day. That's about once every 2-3 hours. Some who are breastfeeding though can eat every 1-5 hours and up to 15 times a day. If your baby isn't waking up on his own for feeding during the first few weeks, you should get him up to eat on schedule. If you're breastfeeding, your little one will spend about 10 to 20 minutes on your breast. Some may nurse for longer but make sure he's sucking and swallowing the whole time. Giving formula: Plan on your baby drinking 1-5 to 3 ounces at each feeding. After about a month, he'll start eating at least 4 ounces at each feeding. As breastfed babies get the hang of nursing, they'll get more milk from you too. You may not notice though since they'll do it in less time. Whether you're nursing or bottle-feeding, as your baby keeps growing, so will his appetite. BUY NOW to access all the newborn care guidelines      [Counseling Nursing](#)
