Patterns for Data-Driven Web Apps Yannis Papakonstantinou, 2012-09-15 Modern web applications offer elegant and intuitive interfaces to data driven business processes but the power of such Web 2.0 data driven applications comes at an increased development and maintenance cost. Technologies such as web service APIs, rich JavaScript, HTML5 components and disparate mobile and tablet platforms require many lines of glue code to interface between multiple layers, sub systems and languages. This book provides web architects and developers with clean Model View Controller patterns along with valuable information on technologies that reduce interfacing code between layers. Together these patterns and technologies lead to rapid development, modular applications and effective code management.
