A Review of Recent Advancements in Deep Reinforcement Learning Artur Sahakjan,2018-08-02 Bachelor Thesis from the year 2018 in the subject Computer Science Commercial Information Technology grade 1 0 University of Duisburg Essen language English abstract

Reinforcement learning is a learning problem in which an actor has to behave optimally in its environment Deep learning methods on the other hand are a subclass of representation learning which in turn focuses on extracting the necessary features for the task e g classification or detection As such they serve as powerful function approximators The combination of those two paradigm results in deep reinforcement learning This thesis gives an overview of the recent advancement in the field The results are divided into two broad research directions value based and policy based approaches This research shows several algorithms from those directions and how they perform Finally multiple open research questions are addressed and new research directions are proposed

[Natural Language Processing in Action, Second Edition](#) Hobson Lane,Maria Dyshel,2025-02-25 Develop your NLP skills from scratch with an open source toolbox of Python packages Transformers Hugging Face vector databases and your own Large Language Models Natural Language Processing in Action Second Edition has helped thousands of data scientists build machines that understand human language In this new and revised

edition you'll discover state of the art Natural Language Processing NLP models like BERT and HuggingFace transformers popular open source frameworks for chatbots and more. You'll create NLP tools that can detect fake news, filter spam, deliver exceptional search results and even build truthfulness and reasoning into Large Language Models LLMs. In Natural Language Processing in Action Second Edition you will learn how to process, analyze, understand and generate natural language text. Build production quality NLP pipelines with spaCy. Build neural networks for NLP using Pytorch, BERT and GPT transformers for English composition, writing code and even organizing your thoughts. Create chatbots and other conversational AI agents. In this new and revised edition you'll discover state of the art NLP models like BERT and HuggingFace transformers, popular open source frameworks for chatbots and more. Plus you'll discover vital skills and techniques for optimizing LLMs including conversational design and automating the trial and error of LLM interactions for effective and accurate results. About the technology: From nearly human chatbots to ultra personalized business reports to AI generated email, news stories and novels, natural language processing NLP has never been more powerful. Groundbreaking advances in deep learning have made high quality open source models and powerful NLP tools like spaCy and PyTorch widely available and ready for production applications. This book is your entrance ticket and backstage pass into the next generation of natural language processing.

About the book: Natural Language Processing in Action Second Edition introduces the foundational technologies and state of the art tools you'll need to write and publish NLP applications. You learn how to create custom models for search, translation, writing assistants and more without relying on big commercial foundation models. This fully updated second edition includes coverage of BERT, Hugging Face transformers, fine tuning large language models and more. What's inside: NLP pipelines with spaCy, Neural networks with PyTorch, BERT and GPT transformers, Conversational design for chatbots. About the reader: For intermediate Python programmers familiar with deep learning basics. About the author: Hobson Lane is a data scientist and machine learning engineer with over twenty years of experience building autonomous systems and NLP pipelines. Maria Dyshel is a social entrepreneur and artificial intelligence expert and the CEO and cofounder of Tangible AI. Cole Howard and Hannes Max Hapke were co-authors of the first edition.

Open AI in Flux Emerald Lawson, 2023-11-22

In the ever-evolving landscape of artificial intelligence, OpenAI stands as a beacon of innovation and progress. **OPEN AI IN FLUX: NAVIGATING THE RECENT TIDES OF CHANGE** offers an in-depth exploration of the latest developments and transformations at OpenAI. This comprehensive guide takes you on a journey through the intricate workings of OpenAI, shedding light on its recent advancements, research breakthroughs, and the impact it has on the world of AI. The book delves into the organization's mission, its pioneering research in artificial general intelligence (AGI), and how it is shaping the future of AI. Whether you're an AI enthusiast, a researcher, or someone intrigued by the potential of AGI, this book provides a valuable insight into the dynamic world of OpenAI. It captures the essence of the organization's commitment to ensuring AGI benefits all of humanity and offers a unique perspective on the transformative power of AI. Discover the exciting world of OpenAI and its role in shaping the future of artificial intelligence.
