Programming and Planning in Early Childhood Settings Leonie Arthur, Bronwyn Beecher, Elizabeth Death, Susan Dockett, Sue Farmer, 2017-08-07 Programming Planning in Early Childhood Settings explores a range of approaches to curriculum and to documenting children's learning in early childhood settings. This valuable resource for early childhood education students and practitioners provides a broad view of the concepts and issues in early childhood curriculum. Chapters reflect ongoing discussions about what is meant by the terms planning and programming in the context of early childhood, what is authentic curriculum for young children and effective teaching strategies to extend young children's learning. The strong focus on sociocultural theories of learning promotes awareness of children's diverse experiences, competencies and learning styles and helps readers recognise the need for collaborative partnerships between educators, children and families in order to develop appropriate programs. Thoroughly revised and updated this new edition shows how chapters of the text are relevant to the Australian Professional Standards for teachers and highlights connections to the school based context. Numerous real life examples, reflections, articles and case studies assist students to understand a variety of educational theories, philosophies and frameworks. Throughout the book there is a focus on the processes of reflection, evaluation and ongoing improvement.

Applied Linguistics and Primary School Teaching Sue Ellis, Elspeth McCartney, 2011-04-07 Modern primary teachers must adapt literacy programmes and ensure efficient learning for all. They must also support children with language and literacy difficulties, children learning English as an additional language and possibly teach a modern foreign language. To do this effectively they need to understand the applied linguistics research that underpins so many different areas of the language and literacy curriculum. This book illustrates the impact of applied linguistics on curriculum frameworks and pedagogy. It captures the range of applied linguistics knowledge that teachers need and illustrates how this is framed and is used by policy makers, researchers, teacher educators and the other professions who work with teachers in schools. It considers how to effect professional development that works. It is essential reading for primary teachers but also for speech and language therapists, educational psychologists, learning support teachers and all those doing language or literacy research in the primary classroom.

Observation and Participation in Early

Childhood Settings Jean Billman,Janice A. Sherman,2003 This text was written to give students experience in using effective methods for observing young children's development ages 0-8 and documenting their observations. Designed to guide students' participation with children of different age groups in a variety of early childhood settings, the text encourages students to interact with children as they learn more about development by carrying out the activities outlined in each chapter. This text models the educational approaches that professionals advocate for early childhood classrooms: observational learning, active learning, guided discovery, choice mini lessons, and cooperative learning. These approaches are incorporated into this text through concise overviews and numerous activities related to early childhood development and education.

Drawing on hundreds of scientifically based research studies and informed teaching practices, this book provides teachers and parents with a repertoire of strategies and interventions to build rich literacy environments. Back cover *Questioning the Language of Improvement and Reform in Education* Nicole Mockler,Susan Groundwater-Smith,2018-05-11 Questioning the Language of Improvement and Reform in Education challenges the language used in education by linking the language of both the public and professional domains with the changing intentions of the governance of education. Exploring various issues which embody the many manifestations of the manner in which strident conservative language has captured the public view of education, the book covers topics such as the importance of language in the context of educational practice, the media's portrayal of teachers globally, the role of students in the face of curriculum reform, and the language used in educational policy worldwide. The book addresses the ways in which the words improvement and reform have been appropriated and hollowed out by policymakers in order to justify globalised education policies. Using international case studies and reports, the authors argue that the employment of specific words masks the reality that new educational policies are regressive and require re-examination while perpetuating the illusion that progressive educational practice is being brought to the fore. Questioning the Language of Improvement and Reform in Education is a fascinating and original take on this topic which will be of great interest to educational practitioners, policymakers and linguists.
