Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD2022 Summer which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications, and tools of computer and information science, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science. **Unveiling Social**

Dynamics and Community Interaction in the Metaverse Gupta, Brij, 2025-04-16 As the metaverse transforms social dynamics and community interactions, security becomes essential to fostering trust and meaningful engagement in virtual spaces. Protecting users from threats like identity theft, harassment, and misinformation is crucial to maintaining safe and inclusive digital communities. The intersection of security and social interaction influences how people form relationships, collaborate, and express themselves in virtual environments. Strong security frameworks help prevent exploitation while enabling positive social experiences, ensuring that digital communities can thrive without fear of manipulation or harm. By addressing these challenges, metaverse security plays a key role in shaping the future of online socialization and digital citizenship. *Unveiling Social Dynamics and Community Interaction in the Metaverse* explores the intersection of security and social dynamics in the metaverse, examining how digital trust, identity protection, and community safety shape virtual interactions. It provides insights into emerging threats, ethical considerations, and strategies for fostering secure and inclusive virtual environments. Covering topics such as community detection, fake review detection, and affective computing, this book is an excellent resource for cybersecurity professionals, metaverse developers, policymakers, technicians, researchers, professionals, scholars, academicians, and more. *Advances in Information Technology in Civil and Building Engineering*

Adel Francis, Edmond Miresco, Silvio Melhado, 2025-03-03 This book gathers the latest advances, innovations, and applications in the field of information technology in civil and building engineering presented at the 20th International Conference on Computing in Civil and Building Engineering (ICCCBE) held in Montreal, Canada, on August 25-28, 2024. It covers highly diverse topics such as BIM, construction, information modeling, knowledge management, GIS, GPS, laser scanning, sensors, monitoring,

VR AR computer aided construction product and process modeling big data and IoT cooperative design mobile computing simulation structural health monitoring computer aided structural control and analysis ICT in geotechnical engineering computational mechanics asset management maintenance urban planning facility management and smart cities Written by leading researchers and engineers and selected by means of a rigorous international peer review process the contributions highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations **The Metaverse and Career Development** K. G. Priyashantha, 2025-10-14 This book explores how the Metaverse may be applied to career development practices Beginning with a systematic review of empirical literature to foreground tested Metaverse applications in both workplace and educational settings the book provides a framework for discussing possible Metaverse applications through five key career stages Growth exploration establishment maintenance and disengagement It then provides best practices policy considerations and implementation guidelines for organizations and educational institutions Ethical considerations including privacy data security digital divide and psychological impacts of prolonged immersion in virtual environments are also discussed This book will interest scholars of digital human resource management human resource development and career management Its practical suggestions may also interest HR practitioners and policymakers

Roadmapping Extended Reality Mariano Alcañiz, Marco Sacco, Jolanda G. Tromp, 2022-08-23 ROADMAPPING EXTENDED REALITY This book offers a comprehensive overview of the technological aspects of Extended Realities XR and discusses the main challenges and future directions in the field This book is important and timely XR technologies have overcome the 3 main aspects that were holding it back from mainstream adoption cost cables and size However there are many aspects of XR technologies that are now going to be explored and developed that still need urgent research in terms of security privacy health and safety long term effects addiction risks and age related developmental concerns and the aim of the book is to inform all readers of these open issues and challenges There are currently a great number of interdisciplinary researchers and developers working in the XR R D field Recently XR technologies moved from the Gartner Hype Cycle onto the Plateau of Productivity on the Gartner Hype Cycle signaling that the fundamental XR technologies are now deemed mature technologies and ready for deployment in a wide variety of application areas Corroborated by the fact that XR technologies are part of the future Metaverse a concept that went rapidly mainstream during the time of writing of this book Roadmapping Extended Reality is divided into two parts 1 fundamentals and 2 applications The first part covers the main technological aspects of XR The chapters in this section review and discuss relevant fundamental concepts of XR the actual state of the art and future challenges The second part of the book focuses on covering a wide range of applications of XR including a future roadmap All in all the book offers a snapshot of the state of the art in XR and addresses the needs of a multidisciplinary audience working in both academia and the industry as well as stakeholders at government agencies and non profit organizations Audience This book is aimed at academic and industrial developers exploring and developing

applications in the XR VR AR AI smart IoT 4th Industrial Revolution space including those that are solving technology requirements human factors evaluation methodology advances and ROI investigations
