Computational Methods for Complex Liquid-Fluid Interfaces Mohammad Taeibi Rahni, Mohsen Karbaschi, Reinhard Miller, 2015-11-11 Computational Methods for Complex Liquid Fluid Interfaces highlights key computational challenges involved in the two way coupling of complex liquid fluid interfaces The book covers a variety of cutting edge experimental and computational techniques ranging from macro to meso and microscale approaches including pivotal applications As example **Variational Methods with Applications in Science and Engineering** Kevin W. Cassel, 2013-07-22 There is a resurgence of applications in which the calculus of variations has direct relevance In addition to application to solid mechanics and dynamics it is now being applied in a variety of numerical methods numerical grid generation modern physics various optimization settings and fluid dynamics Many applications such as nonlinear optimal control theory applied to continuous systems have only recently become tractable computationally with the advent of advanced algorithms and large computer systems This book reflects the strong connection between calculus of variations and the applications for which variational methods form the fundamental foundation The mathematical fundamentals of calculus of variations at least those necessary to pursue applications is rather compact and is contained in a single chapter of the book The majority of the text consists of applications of variational calculus for a variety of fields *Foaming with Supercritical Fluids* Ernesto Di Maio, Salvatore Iannace, Giuseppe Mensitieri, 2021-11-06 Foaming with Supercritical Fluids Volume Nine provides a comprehensive description of the use of supercritical fluids as blowing agents in polymer foaming To this aim the fundamental issues on which the proper design and control of this process are rooted are discussed in detail with specific attention devoted to the theoretical and experimental aspects of sorption thermodynamics of a blowing agent within a polymer the effect of the absorbed blowing agent on the thermal interfacial and rheological properties of the expanding matter and the phase separation of the gaseous phase and of the related bubble nucleation and growth phenomena Several foaming technologies based on the use of supercritical blowing agents are then described addressing the main issues in the light of the underlying chemical physical phenomena Offers strong fundamentals on polymer properties important on foaming Outlines the use of supercritical fluids for foaming Covers theoretical points of view including foam formation of the polymer gas solution to the setting of the final foam Discusses the several processing technologies and applications [Books and Periodicals Online](#) ,1994 *Chemical Engineering Progress* ,2007 *Subject Guide to Books in Print* ,1997

Complex Heterogeneous Systems Markus Schmuck, 2024-04-22 The author's research on energy storage systems generally was confronted with five characteristics i.e. complex interacting transporting reacting and heterogeneous systems Hence we refer to these kind of systems as Complex Heterogeneous Systems (CHEsS) The work considers interacting systems that exchange energy mass information etc in various ways The elementary building blocks of CHEsS are based on fundamental thermodynamic chemical material physical and mathematical principles such as variational and graph theoretic

concepts It investigates ways of defining complexity computing percolation thresholds making smart decisions also by learning from data past experiences e g providing a systematic approach towards battery management systems and identifying battery life e g by blow up analysis of highly nonlinear concentrated solutions Ultimately the elaborated tools shall allow the reader to obtain a general understanding for simulating also on quantum computers controlling and developing CHeSs as well as to pave the way for a general theory on CHeSs generalizing the view on complexity measurement estimation and control *American Book Publishing Record* ,1995 New Technical Books New York Public Library,1983
