## Preface

The idea for this piece of literature came from the Narcotics Anonymous Fellowship itself. Beginning in the early 1980s, we began receiving Twelve Step guides and step worksheets along with requests that we develop a standard set of guides for the NA Fellowship to use in working through the Twelve Steps. Fellowship demand propelled this project up the NA World Service Conference Literature Committee's priority wordlists, and finally resulted in the World Service Conference directing the WSLC to go ahead with the project at WSC'95.

The working title for this project for many years was the "Step Writing Guides." However, we recognized that the word "writing" imposed a limitation on members who may be unable to write or may choose not to use writing as the means for working the Twelve Steps. Therefore, the title became the *Step Working Guides*.

Each chapter includes both narrative and questions. The narrative is meant to provoke thought about the questions, but is not meant to be comprehensive. There is a difference in "voice" between the narrative and the questions. The narrative is written in the "we" voice in order to promote unity about what we all have in common: our addiction and recovery. The questions are written in the individual "I" voice so that each member using these guides can personalize the work. The *Step Working Guides* is a companion piece to *It Works: How and Why*. Thorough discussion of each of the Twelve Steps is contained in that work. Additional information about NA recovery can be found in other NA literature. If we find that any of the terms used in this book are

**Step Workbook for Adolescent Chemical Dependency Recovery** Steven L. Ackley, Gail B. Ladwig, Beth Ann Swan, Sharon J. Tucker, 2007-12-18 This groundbreaking reference created by an internationally respected team of clinical and research experts provides quick access to concise summaries of the body of nursing research for 192 common medical surgical interventions. Each nursing care guideline classifies specific nursing activities as Effective, Possibly Effective or Possibly Harmful providing a bridge between research and clinical practice. Ideal for both nursing students and practicing nurses this evidence based reference is your key to confidently evaluating the latest research findings and effectively applying best practices in the clinical setting. Synthesizing the current state of research evidence each nursing care guideline classifies specific activities as Effective, Possibly Effective, Not Effective or Possibly Harmful. Easy to recognize icons for each cited study help you differentiate between findings that are based on nursing research, NR (multidisciplinary research), MR (expert opinion), EO (those activities that represent established standards of practice), SP (Each nursing activity is rated by level of evidence allowing you to gauge the validity of the research and weigh additional evidence you may encounter). Guidelines are identified by NIC intervention labels wherever appropriate and NOC outcome measurements are incorporated throughout. An Evolve website provides additional evidence based nursing resources.

*Psychodynamic Approaches for Treatment of Drug Abuse and Addiction* David Potok, 2020-11-29 This book provides clinicians and students with insights on the use of psychodynamic therapy to treat drug abuse and addiction combining theory with clinical case material. The perspectives of analysts such as Abraham Rado, Zimmel, Tibout, Wurmser, Khanzian, Krystal and McDougall are reviewed alongside original and more recent conceptualizations of drug addiction and recovery based on Kleinian, Winnicottian and Kohutian ideas. The case material deals with clinical phenomena that characterize working with this complex population such as intense projective identification, countertransference, difficulties and relapses. The theoretical analysis covers a range of concepts such as John Steiner's psychic shelters and Betty Joseph's near death addiction which are yet to be fully explored in the context of addiction. Prevalent topics in the addiction field such as the reward system, the cycle of change and the 12 step program are also discussed in relation to psychodynamic theory and
