**Media Today** Joseph Turow,2026-03-24 This ninth edition of Joseph Turow's pathbreaking media textbook uses convergence as a lens that puts students at the center of the profound changes in the 21st century media world. It teaches students to think critically about the role of media and what these changes mean for their lives. The book's media systems approach helps students to look carefully at how media content is created, distributed and exhibited in the new world that the digital revolution has created. From news media to video games and social networking to mobile platforms and streaming, it provides students with the tools they need to understand and critique the media they encounter and consume. The first part examines the media world as a whole while the second delves deep into key media industries such as the movie, television and video streaming and video game industries. This new edition includes critical expanded coverage of social media economies, cross border media issues, the rise of news influencers and subscription platforms and the growing use of predictive and generative artificial intelligence as well as brand new case studies and updated figures, tables and pedagogy, including key terms and further activities. *Media Today* is an excellent introduction to the world of media in the digital age, perfect for students seeking a solid grounding in media studies. Extensive pedagogical materials also make this a highly teachable book well suited to the classroom. **The Film of the Islamic State** Yorck Beese,2024-05-27 The film of the so called Islamic State is part of the still relatively opaque history of radical Sunni Islamist video propaganda, a field in which

it is simultaneously its strongest exponent Through its imports of aesthetics in the age of digitalization and the concurrent de professionalization of film this violent propaganda film has interestingly drawn attention for its seeming likeness to Hollywood film an odd comparison that the Islamic State itself opposes through its own filmic antagonisms to commercial cinema In an intermittent attempt at attacking cinematic illusionism it has made increasing use of cinematic devices in order to communicate its violent and anti humanist ideology and has thereby entered a state of filmic self contradiction This book analyzes and uncovers the mechanisms and dynamics of ideological communication in the Islamic State s videos through a combined historical and neoformalist approach making them predictable for future researchers

### **The Legal Singularity**

Abdi Aidid,Benjamin Alarie,2023-06-26 Law today is incomplete inaccessible unclear underdeveloped and often perplexing to those whom it affects In The Legal Singularity Abdi Aidid and Benjamin Alarie argue that the proliferation of artificial intelligence enabled technology and specifically the advent of legal prediction is on the verge of radically reconfiguring the law our institutions and our society for the better Revealing the ways in which our legal institutions underperform and are expensive to administer the book highlights the negative social consequences associated with our legal status quo Given the infirmities of the current state of the law and our legal institutions the silver lining is that there is ample room for improvement With concerted action technology can help us to ameliorate the problems of the law and improve our legal institutions Inspired in part by the concept of the technological singularity The Legal Singularity presents a future state in which technology facilitates the functional completeness of law where the law is at once extraordinarily more complex in its specification than it is today and yet operationally the law is vastly more knowable fairer and clearer for its subjects Aidid and Alarie describe the changes that will culminate in the legal singularity and explore the implications for the law and its institutions
