Life After Google
George Gilder, 2018-07-17 A FINANCIAL TIMES BOOK OF THE MONTH FROM THE WALL STREET JOURNAL Nothing Mr Gilder says or writes is ever delivered at anything less than the fullest philosophical decibel Mr Gilder sounds less like a tech guru than a poet and his words tumble out in a romantic cascade Google s algorithms assume the world s future is nothing more than the next moment in a random process George Gilder shows how deep this assumption goes what motivates people to make it and why it s wrong the future depends on human action Peter Thiel founder of PayPal and Palantir Technologies and author of Zero to One Notes on Startups or How to Build the Future The Age of Google built on big data and machine intelligence has been an awesome era But it s coming to an end In Life after Google George Gilder the peerless visionary of technology and culture explains why Silicon Valley is suffering a nervous breakdown and what to expect as the post Google age dawns Google s astonishing ability to search and sort attracts the entire world to its search engine and countless other goodies videos maps email calendars And everything it offers is free or so it seems Instead of paying directly users submit to advertising The system of aggregate and advertise works for a while if you control an empire of data centers but a market without prices strangles entrepreneurship and turns the Internet into a wasteland of ads The crisis is not just economic Even as advances in artificial intelligence induce delusions of omnipotence and transcendence Silicon Valley has pretty much given up on security The Internet firewalls supposedly protecting all those passwords and personal information have proved hopelessly permeable The crisis cannot be solved within the current computer and network architecture The future lies with the cryptocosm the new architecture of the blockchain and its derivatives Enabling cryptocurrencies such as bitcoin and ether NEO and Hashgraph it will provide the Internet a secure global payments system ending the aggregate and advertise Age of Google Silicon Valley long dominated by a few giants faces a great unbundling which will disperse computer power and commerce and transform the economy and the Internet Life after Google is almost here For fans of Wealth and Poverty Knowledge and Power and The Scandal of Money
