Castro,Irene P. Navarro,2009 Mexico s economic political and societal issues have become major points of interest to countries all over the globe Mexico is the second leading market for U S exports after Canada and is the third most important source of U S imports after Canada and China The United States is Mexico s most important customer by far receiving about 80 per cent of Mexico s exports including petroleum automobiles auto parts and winter vegetables and providing about 50 per cent of Mexico s imports The United States is the source of over 60 per cent of foreign investment in Mexico and the primary source of important tourism earnings Mexico is also the leading country in Latin America in terms of U S investment with the total stock of U S investment being about 85 billion in 2006 This book presents in depth analyses of such issues as foreign policy political reform and overall economic developments *Migrant Remittances in South Asia* M. Rahman,T. Yong,A. Ullah,2014-11-25 This volume provides theoretical treatments of remittance on how its development potential is translated into reality The authors meticulously delve into diverse mechanisms through which migrant communities remit investigating how recipients engage in the development process in South Asia The Routledge Handbook of Comparative Rural Policy Matteo Vittuari,John Devlin,Marco Pagani,Thomas G. Johnson,2019-10-16 This volume represents the result of almost two

decades of trans Atlantic collaborative development of a policy research paradigm the International Comparative Rural Policy Studies program Over this period dozens of scientists from different disciplines but with a common interest in rural issues and policy have collaboratively studied the policies in North America Europe and other parts of the world A core element of the book is the idea and practice of comparative research and analysis what can be learned from comparisons how and why policies vary in different contexts and what lessons might or might not be transferable across borders It provides skills for the use of comparative methods as important tools to analyze the functioning of strategies and specific policy interventions in different contexts and a holistic approach for the management of resources in rural regions It promotes innovation as a tool to valorize endogenous resources and empower local communities and offers case studies of rural policy in specific contexts The book largely adopts a territorial approach to rural policy This means the book is more interested in rural regions their people and economies and in the policies that affect them than in rural sectors and sectoral policies per se The audience of the book is by definition international and includes students attending courses in agricultural and rural policy rural and regional studies and natural resource management lecturers seeking course material and case studies to present to their students in any of the courses listed above professionals working in the field of rural policy policy makers and civil servants at different levels seeking tools to better understand rural policy both at the local and global scale and to better recognize and comprehend how to transfer best practices

Schiff, 2007-08-20 This second volume provides thinking on new topics in the field of international migration and presents nine additional studies covering countries in Latin America and the Caribbean Middle East and North Africa North America South Asia and the Pacific as well as Western Europe Regional Economic Development and Mexican Out-migration Kurt Unger, 2005 This paper shows evidence of positive effects in the economic development of sending communities in Mexico due to migration The principal hypothesis of this study is that remittances knowledge and experience acquired by migrants during their migratory cycle can be translated into larger economic growth in the out migration municipalities This result presupposes that Government could create complementary incentives to take advantage of profitable activities Economic and migration data for each municipality is used which allows to associate characteristics of communities migratory flows and the effects in profitable activities There are three sections A first section describes the sending municipalities according to migratory intensity and their urban rural nature The second section analyzes the relation between remittances and socioeconomic conditions of the communities In a third section the effect over time is estimated relating per capita income growth and migratory flows intensity The most relevant results are the existence of income convergence over time between high and low migration municipalities in the North and South of

Mexico As well we find a positive and significant relation between per capita income growth and the percentage of households that receive remittances across communities both at the country level and for the northern and southern regions separately National Bureau of Economic Research web site **IOM News** International Organization for Migration,2000
