Hallegatte,2014-09-17 This book explores economic concepts related to disaster losses describes mechanisms that determine the economic consequences of a disaster and reviews methodologies for making decisions regarding risk management and adaptation The author addresses the need for better understanding of the consequences of disasters and reviews and analyzes three scientific debates on linkage between disaster risk management and adaptation to climate change The first involves the existence and magnitude of long term economic impact of natural disasters on development The second is the disagreement over whether any development is the proper solution to high vulnerability to disaster risk The third debate involves the difficulty of drawing connections between natural disasters and climate change and the challenge in managing them through an integrated strategy The introduction describes economic views of disaster including direct and indirect costs output and welfare losses and use of econometric tools to measure losses The next section defines disaster risk delineates between good and bad risk taking and discusses a pathway to balanced growth A section entitled Trends in Hazards and the Role of Climate Change sets scenarios for climate change analysis discusses statistical and physical models for downscaling global climate scenarios to extreme event scenarios and considers how to consider extremes of hot and cold storms wind drought and flood Another section analyzes case studies on hurricanes and the US coastline sea level rises and storm surge in Copenhagen and heavy precipitation in Mumbai A section on Methodologies for disaster risk management includes a study on cost benefit analysis of coastal protections in New Orleans and one on early warning systems in developing countries The next section outlines decision making in disaster risk management including robust decision making No regret and No risk strategies and strategies that reduce time horizons for decision making Among the conclusions is the assertion that risk management policies must recognize the benefits of risk taking and avoid suppressing it entirely The main message is that a combination of disaster risk reduction resilience building and adaptation policies can yield large potential gains and synergies

community Through the help of specific case studies presented as individual chapters the book aims to find out whether adaptation due to environmental stress is an individual decision and therefore is an isolated phenomenon or if resilience and adaptation are part of the same action paradigm of society as a whole in response to environmental change Of particular interest are the case studies of climate change or disasters that have rendered the site unsuitable for the return of its community at present and thus necessitated the relocation of such communities to new locations The case studies in the book focus on regions in India but cover different parts of the world as well and address concepts of resilience vulnerability risk adaptation and mitigation The book will be useful for students and researchers in the fields of geography disaster management environmental science and anthropology

### **Climate Change as Environmental and Economic Hazard**

Boris Porfiriev, 2009-12 The current policy for climate change prioritises mitigation over adaptation The collected papers of Climate Change as Environmental and Economic Hazard argue that although efforts to reduce greenhouse gas emissions are still vital the new policy paradigm should shift the priority to adaptation with a special focus on disaster risk reduction It should also consider climate change not purely as a hazard and a challenge but as a window of opportunity to shift to a new sustainable development policy model which stresses the particular importance of communities resilience The papers in this volume explore the key issues linked to this shift including Increasing research into the Earth Sciences climate reconstruction and forecasting in order to decrease the degree of uncertainty about the origin development and implications of climate change The introduction of more binding and comprehensive regulation of both greenhouse gas emissions and adaptation measures like that in the United Kingdom Matching climate policy with that for disasters and mainstreaming it into overall development strategies The volume is a valuable addition to previous climate change research and considers a new policy approach to this new global challenge

**Adaptation to Climate Change** Mark Pelling, 2010-10-18 The impacts of climate change are already being felt Learning how to live with these impacts is a priority for human development In this context it is too easy to see adaptation as a narrowly defensive task protecting core assets or functions from the risks of climate change A more profound engagement which sees climate change risks as a product and driver of social as well as natural systems and their interaction is called for Adaptation to Climate Change argues that without care adaptive actions can deny the deeper political and cultural roots that call for significant change in social and political relations if human vulnerability to climate change associated risk is to be reduced This book presents a framework for making sense of the range of choices facing humanity structured around resilience stability transition incremental social change and the exercising of existing rights and transformation new rights claims and changes in political regimes The resilience transition transformation framework is supported by three detailed case study chapters These also illustrate the diversity of contexts where adaption is unfolding from organizations to urban governance and the national polity This text is the first comprehensive analysis of the social dimensions to climate change adaptation Clearly written in an engaging style it provides detailed theoretical and empirical chapters and serves as an invaluable reference for undergraduate and postgraduate students interested in climate change geography and development studies
