Open-Source Ethics View William Martin, AI, 2025-02-20 Open Source Ethics View explores the crucial intersection of technology and philosophy by examining the ethical dimensions of open source practices. It delves into how knowledge sharing and collaborative software development foundational principles of the open source movement can remain ethically sound. The book highlights the importance of understanding the motivations behind collaborative software creation such as fostering innovation and promoting accessibility. Additionally, it examines ethical frameworks within open source referencing established guidelines and licenses to identify common principles and potential conflicts. The book approaches its subject by first introducing the core concepts of open source philosophy and then developing its central argument through case studies illustrating ethical dilemmas like responsible forking and community governance. It progresses by offering practical guidelines for ethical open source participation. One intriguing aspect is its analysis of landmark legal cases and licensing debates providing a clear understanding of the intellectual property landscape. The book argues that open source is not merely a development methodology but a value driven ecosystem with significant ethical implications. The book's unique value lies in its multi layered analysis combining philosophical theory with real world examples and practical recommendations. This approach allows readers to engage with the material on both a theoretical and practical level, making it valuable for software developers, project managers, and anyone interested in technology ethics.

Proceedings of 8th ASRES International Conference on Intelligent Technologies Vipin Kumar Tripathi, Karm Veer Arya, Ciro Rodriguez, 2025-03-15 This book gathers the proceedings of the 8th International Conference on Intelligent Technologies (ICIT) held on December 15-17, 2023 at the Matana University, Jakarta, Indonesia. The respective contributions from industrial practitioners and researchers present advanced studies related to the application of intelligent technologies in various fields of research, industry, and society. This includes applications in a variety of fields such as computational intelligence, data science, and engineering communication and networking, signal and image processing, electrical devices, circuits, systems, robotics, instrumentation, automation, biomedical, and health care.

A Long View of Research and Practice in Operations Research and Management Science ManMohan S. Sodhi, Christopher S. Tang, 2010-09-09 From the Foreword by Marshall Fisher, The Wharton School, University of Pennsylvania. As generations of academics and practitioners follow, generation, it is worthwhile to compile long views of the research and practice in the past to shed light on research and practice going forward. This collection of peer-reviewed articles is intended to provide such a long view. This book contains a collection of chapters written by leading scholars and practitioners who have continued their efforts in developing and/or implementing innovative OR/MS tools for solving real-world problems. In this book, the contributors share their perspectives about the past, present, and future of OR/MS theoretical development, solution tools, modeling approaches, and applications. Specifically, this book collects chapters that offer insights about the following topics: Survey articles taking a long view over

the past two or more decades to arrive at the present state of the art while outlining ideas for future research Surveys focus on use of a particular OR MS approach e g mathematical programming LP MILP etc and solution methods for particular family of application e g distribution system design distribution planning system health care Autobiographical or biographical accounts of how particular inventions e g Structured Modeling were made These could include personal experiences in early development of OR MS and an overview of what has happened since Development of OR MS mathematical tools e g stochastic programming optimization theory Development of OR MS in a particular industry sector such as global supply chain management Modeling systems for OR MS and their development over time as well as speculation on future development e g LINDO LINGO and What sBest New applications of OR MS models e g happiness The target audience of this book is young researchers graduate advanced undergraduate students from OR MS and related fields like computer science engineering and management as well as practitioners who want to understand how OR MS modeling came about over the past few decades and what research topics or modeling approaches they could pursue in research or application

4D Imaging to 4D Printing Rupinder Singh,2022-12-30 This book focuses on applications of 4D imaging and 4D printing for development of low cost indigenous lab scale solutions for various biomedical applications It is based on a selection of benchmark open source 4D imaging solutions including the effect of different stimulus such as light electric field magnetic field mechanical load thermal hydro and so forth to better understand 4D capabilities of printed components The material is covered across nine chapters dedicated to 4D imaging 4D printing and their specific biomedical applications illustrated via case studies related to orthopaedic and dental requirements of veterinary patients The book Presents exclusive material on the integration of 4D imaging and 4D printing Demonstrates the industrial applications of 4D imaging in 4D printing using multiple case studies Discusses use of open source 4D imaging tools for biomedical applications Includes in house development of smart materials for 4D printing Reviews low cost indigenous lab scale solutions for various veterinary applications This book is aimed at graduate students and researchers in Additive Manufacturing Manufacturing Engineering Production Engineering Mechanical Engineering and Materials Engineering

Recent Advances and the Future Generation of Neuroinformatics Infrastructure Xi Cheng,Daniel R. Weinberger,Daniel Marcus,John Van Horn,Venkata Satyanand Mattay,Qian Luo,2015-12-11 The huge volume of multi modal neuroimaging data across different neuroscience communities has posed a daunting challenge to traditional methods of data sharing data archiving data processing and data analysis Neuroinformatics plays a crucial role in creating advanced methodologies and tools for the handling of varied and heterogeneous datasets in order to better understand the structure and function of the brain These tools and methodologies not only enhance data collection analysis integration interpretation modeling and dissemination of data but also promote data sharing and collaboration This Neuroinformatics Research Topic aims to summarize the state of art of the current achievements and explores the directions for the future generation of neuroinformatics infrastructure The publications

present solutions for data archiving data processing and workflow data mining and system integration methodologies Some of the systems presented are large in scale geographically distributed and already have a well established user community Some discuss opportunities and methodologies that facilitate large scale parallel data processing tasks under a heterogeneous computational environment We wish to stimulate on going discussions at the level of the neuroinformatics infrastructure including the common challenges new technologies of maximum benefit key features of next generation infrastructure etc We have asked leading research groups from different research areas of neuroscience neuroimaging to provide their thoughts on the development of a state of the art and highly efficient neuroinformatics infrastructure Such discussions will inspire and help guide the development of a state of the art highly efficient neuroinformatics infrastructure

Digital Twin Adoption and BIM-GIS Implementation Samad Sepasgozar,Sara Shirowzhan,2024-08-09 The aim of this edited book volume is to present new concepts and applications of Digital Twin and relevant tools in the built environment context The book identifies key organisational factors that influence the adoption of technology within the architectural service industry setting the stage for a deeper understanding of the shift towards digital methodologies The book introduces the Digital Twin Readiness Level framework a modified metric system with ten levels of risk based maturity and an empirical development of a Digital Twin Adoption Model Furthermore the text ventures into immersive virtual environments and their applications showcasing innovative practices that enhance learning and operational efficiency Additionally the book examines the integration of Building Information Modelling BIM and Geographic Information Systems GIS revealing new workflows for creating 3D models of cities A focus on Australia s government funded infrastructure projects offers insights into the values and acceptance criteria for these technologies providing a comprehensive overview of their practical implications and future potential This book is essential reading for practitioners engineers and managers involved in any phase of the built environment from design to operation and other architectural engineering and construction AEC stakeholders who are a part of digital transformations as well as researchers educators and students interested in the field
