Robertson,2025-09-03 Supply Chain Analytics second edition introduces the reader to data analytics and demonstrates the value of its effective use in the improvement of supply chain SC process performance By describing four key SC processes and illustrating through worked examples how the descriptive predictive and prescriptive analytic methods can be applied to enhance those processes this book presents a more comprehensive learning experience for the reader than has been offered previously Key topics and issues are addressed including the capriciousness of modern SC operating environments the imperative of SC sustainability the need for heightened SC risk management the building of SC resilience the pursuit of SC optimisation and the use of big data data mining cloud computing machine learning artificial intelligence AI and importantly

the social issues confronting SC analysts in carrying out their work The author identifies four core SC processes strategy design execution and people to which the analytic techniques explained can be applied to ensure continuous performance improvement and the growth of competitive advantage Pedagogy to aid learning is incorporated throughout including an opening section for each chapter explaining the intended learning outcomes worked examples illustrating how each analytic technique works how it is applied and what to be careful of tables diagrams and equations to help visualise the concepts and methods covered end of chapter case studies review questions and assignment tasks Providing both management expertise and technical skills which are essential to decision makers in the SC this textbook is an essential reading for advanced undergraduate and postgraduate students of SC analytics SC leaders and SC operations management professionals Its practice based and applied approach also makes it valuable for teaching academics organisational trainers and coaches operating SC practitioners and those pursuing professional qualifications Online resources include chapter by chapter PowerPoint slides tutorial exercises written assignments worked examples using Excel and a test bank of exam questions
